

GREEN CAMPUS POLICY

The institution gives primary importance to maintain a Green campus by enhancing eco friendly activities among the student community. A green campus is the place where environment and education hold hands together to envision a promising future. The participation of students and other stakeholders are inevitable in maintaining the green campus. The institution ensures green campus through Green Campus Cell, Eco Club, and NSS. The institution has framed the green policy to perpetuate a rapport between the environment and education.

Objectives:

- The primary objective of Green Campus Policy is to make the institution a self-sustainable one in terms of energy, water, and cleanliness.
- To create awareness among the students, teaching and non-teaching staff members to develop a healthy world.
- To amplify the importance of environment and ecosystem for a serene present, as well as future.
- To reduce the usage of non-renewable source and the emission of hazardous gases.
- To cherish the available resources.

Practical Principles:

- Usages of renewable resources are encouraged.
- Installation of solar panels to conserve non-renewable resources.
- Encourages paperless communication.
- All the waste materials are segregated according to their category and treated to make it less hazardous.
- Plastic bags are banned and the usages of cloth bags are encouraged inside the campus.
- To reduce air pollution, students and staff members' vehicles are made to halt their vehicles outside the campus.
- In order to reduce the pollution, Teaching staff, non-teaching staff and students are motivated to use the college transport facility.
- Utilization of energy efficient equipments are promoted.
- Rain water harvesting
- Awareness programmes are conducted on environment through clubs and cells.
- Taps and pipelines are regularly checked to avoid leakage.
