Introduction

School Studio is **Learning Management System** software aimed to make administrative works of educational institutions easier. Using this software you will be able to handle all the day to day functions of your institution in a comprehensive manner. It is user-friendly and very easy to learn.

School Studio is PHP based software developed to cater to the needs of the educational sector. This software will help you systematize the running of schools/colleges and make it far more efficient in the process. We have made in depth duties into the various systems opted by schools and institutions and have developed this software to ease the stress behind its working. Our product is very cost effective and very easy to use.

PROBLEM STATEMENT

Element	Description
The problem of ...	Educational Institute have to maintain a large number of files, reports and ledger books related to management and administration duties
Affects ...	considerable amounts of time and human effort that was spent on managing and maintaining hard copy documents
And results in ...	headaches for Education management in the form of maintaining different data
Benefits of a solution ...	<ul style="list-style-type: none">▪ Automatic operations for all departments;▪ Multiple campus management;▪ Good communication interface; ▪ Easy collection and operation of large databases;▪ Cost-effective solutions.

BACKGROUND

School Studio is designed for efficiently managing educational institute functions is highly advantageous in many ways. Teaching faculties can notify students and organize classes on the web. They can utilize this software to keep in touch with their students. With the help of this software, parents can monitor their children's academic and extra-curricular performance. As all the parents have a chief concern whether their children are performing properly in educational institute or not. This software will update parents of their children's track record so that they can consult with teachers about what to do next.

Another important of educational institute embracing this web-based software is that their examination management is very much simplified. With the help of educational institute management software, you can upload details related to examination

schedule, results and previous question papers without much effort. With the help of this software, attendance of teaching staff and students can be managed in a swift way. In fact, automated mechanism of marking, teaching staff's attendance and assigning substitute teacher in case another staff member is absent and all of this combined together forms a smooth chain of operations. There were many instances when users who wanted to pay through an alternate mode of payment with the limitation of only cash system were a major drawback. With the fee management feature of the web-based software enabled users to pay their fee in their preferred mode of payment. It is up to you, choose the software that fully satisfies your demands and need to make sure you have the right hardware in place before installing the software of your choice.

NEEDS STATEMENT

There was a time when academic institutions, especially educational institutes have to maintain a large number of files, reports and ledger books related to management and administration duties. As everything now is fully computerized, educational institutes saved considerable amounts of time and human effort that was spent on managing and maintaining hard copy documents. However, another issue started to make headaches for educational institute management in the form of maintaining different data on different computer systems, which is a replication of the same work again and again.

OBJECTIVE & PROPOSED TECHNICAL APPROACH

In today's world of speed, educational institutes would be crushed under the huge paperwork volume without the use of specialized management software. From institute managers to the teaching staff, software tools are of great help: they save effort and energy with annoying tasks and give teacher time back to students.

Time-saving functionalities

Inbuilt features allow institute managers, administrators, chancellors and library members to improve performance quality and enjoy superior value of the educational act. Here are some of the most valuable functions made effortless by software tools.

- 1. Management of large databases and datasheets collection.*
- 2. Fee collection procedures from students no longer pose paperwork and registration problems.*
- 3. Posting course schedules online – a task that every teaching staff member should be able to perform thanks to a software platform.*
- 4. Easy admission processes even where aptitude and ability tests are needed: the use of the management software would dramatically reduce paper work in the evaluation procedure. The online tests and exams could also allow for easier filtering of students.*
- 5. Graphical analysis of student's performance is much needed for records. Graphs should also be available for finance and examinations.*

6. Regular campus stats and updates.

Core modules that make the difference

Numerous benefits are available for administrative staff, students, parents and teachers alike.

Benefits to management

- Automatic operations for all departments;
- Timetables and online boards for updates and notifications;
- Multiple campus management;
- Good communication interface;
- Easy collection and operation of large databases;
- Cost-effective solutions.

Benefits for students

- Access to schedules, information about exams, attendance and grades;
- Improved interaction with teachers, peers and administrative departments;
- Discussion forums and the possibility to publish reviews and articles;
- Electronic library access;
- Online submission of homework.

Benefits for Teachers

- Reduced paperwork;
- Computerized management of marks, grades and attendance sheets;
- Online schedules;
- More time available for students;
- Improved communication with parents and students;
- Online homework assignments etc.

Benefits for Parents

- Enhanced involvement in educational institute activities;
- Reliable information on child's education performance;
- Easy fee payment without paper work and waste of time;
- Institute updates on upcoming events.

Implementation

CLIENT SIDE

Hardware Interfaces

The system is a web based application; clients are requiring using a modern web browser such as Google Chrome, Internet Explorer 9 and Enable Cookies. The computer must have an Internet connection in order to be able to access the system.

Software Interfaces

An OS is capable of running a modern web browser which supports HTML version 5 or higher

Communications Interfaces

The HTTP protocol will be used to facilitate communications between the client and server

Mobile Devices

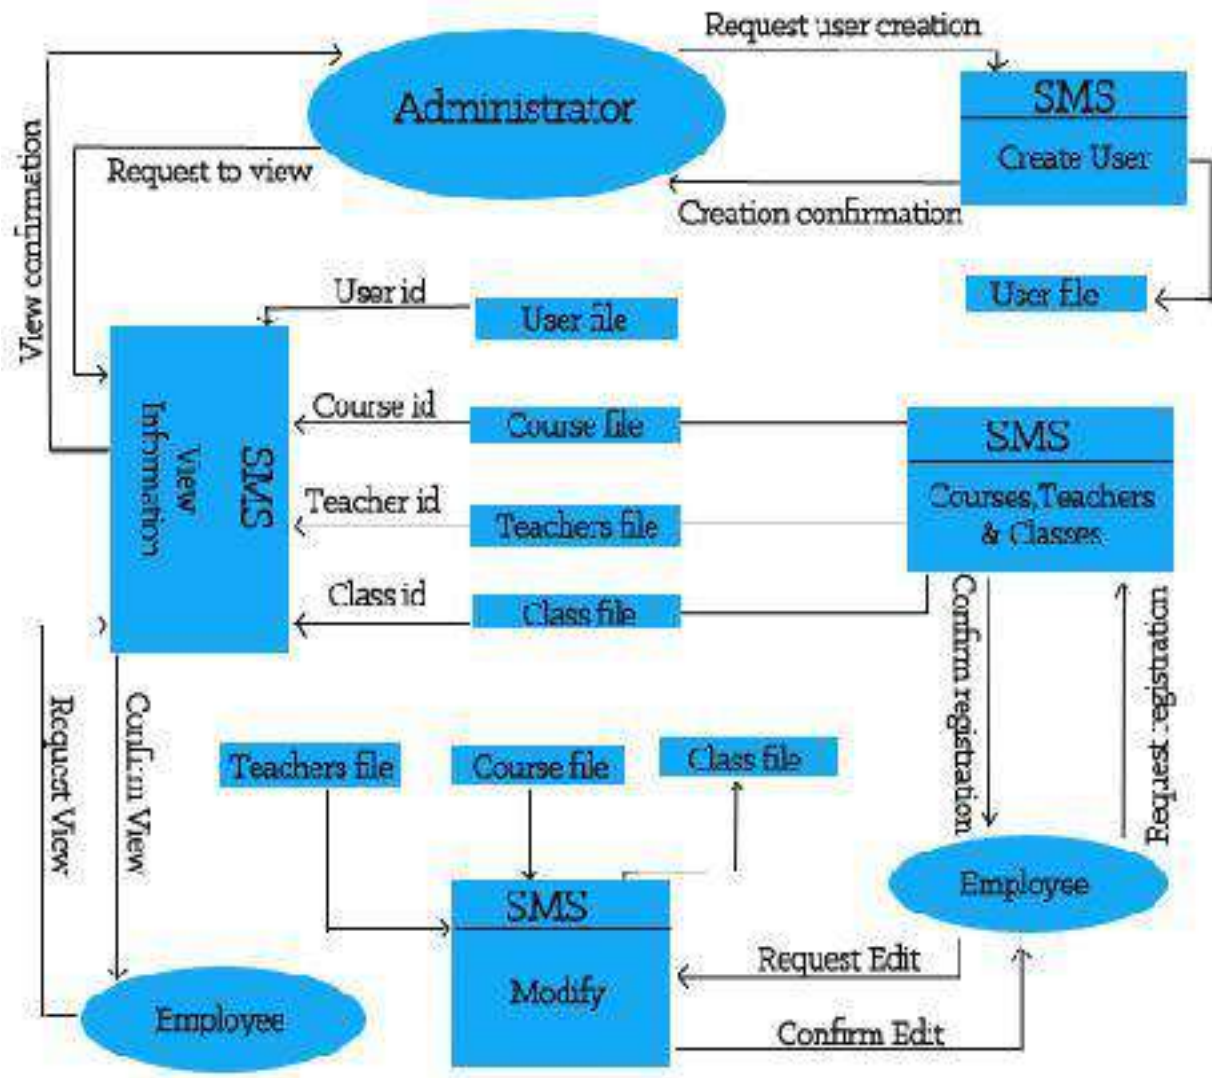

The System is also supported on mobile devices such as cell phones, Tablets etc

ARCHITECTURE DESIGN

The School Studio Architecture will be based on 3tier approach: the client tier, service tier and the database tier. The system will be developed using common components and use mostly out of box functionality and custom code when necessary.

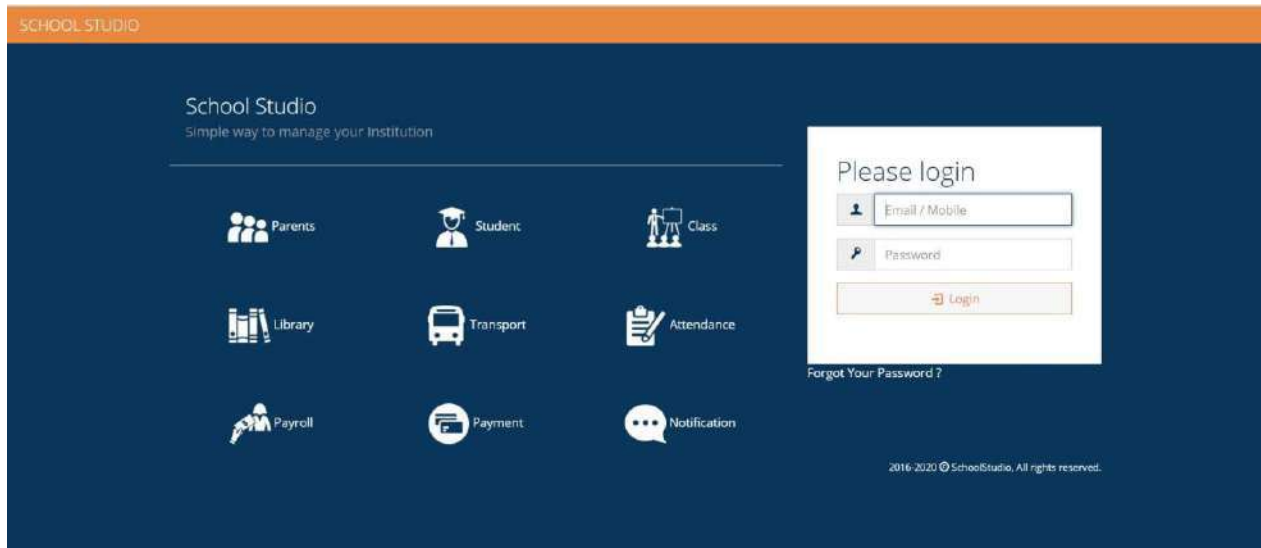

The figure above shows how the system users intervene with the process of the educational institute management system for teachers, courses and how data are sent into different Data files. It shows in general how users interact with the system and how data are being processed to respond the user request.

Data Flow Diagram

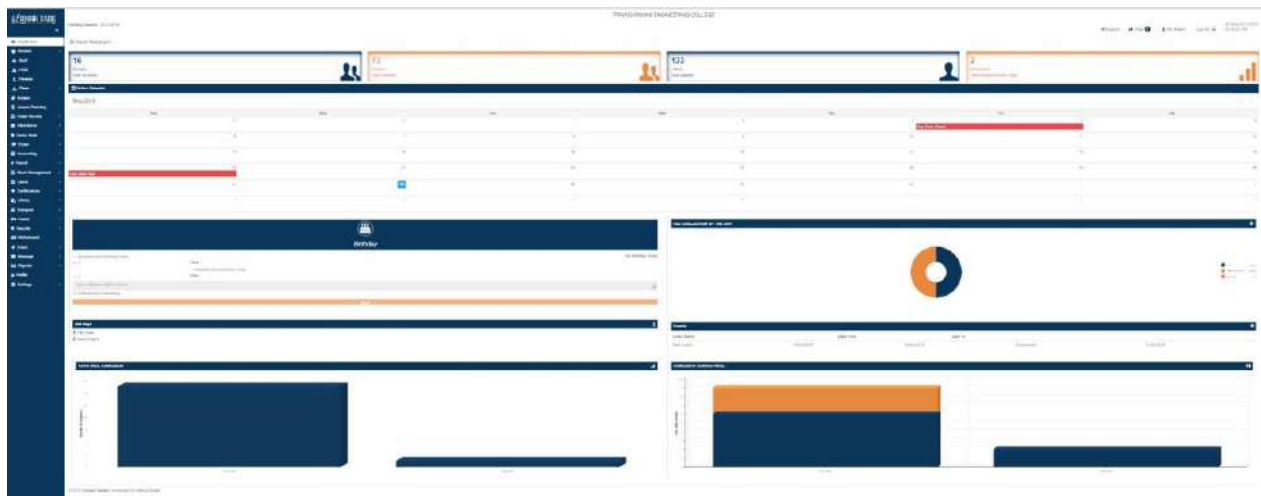

IMPLEMENTATION DESIGN

The Login Page

The figure below is the page where is the login utility. Here there is authentication for users. The user must specify his/her Username and password then login as Administrator to perform the required tasks.

Home Page of SCHOOL STUDIO

The figure above shows how the system looks at its home page. This is the interface for everyone who can access the system.

Page for admission of students

The screenshot shows the 'Add Student' page in the School Studio interface. The page title is 'School Studio' and the running session is '2017-2018'. The left sidebar contains navigation options like 'Dashboard', 'Student', 'Admit Student', 'Student Information', 'Student Promotion', 'Admit', 'Teacher', 'HOD', 'Parents', 'Class', 'Subject', 'Lesson Planning', 'Class Routine', 'Attendance', 'Home Work', 'Exam', 'Accounting', 'Payroll', 'Stock Management', and 'Leave'. The main content area is titled 'Add Student' and contains an 'Admission Form' with the following fields: Name (text input), Class (dropdown), Section (dropdown), Register Number / Roll Number (text input), Student Photo (upload button), Gender (dropdown), District (dropdown), Blood Group (radio buttons for O+, O-, A+, A-, B+, B-, AB+, AB-), Nationality (text input), and Religion (text input). A 'Student Admission Notes' box on the right provides instructions: 'Admitting new students will automatically create an enrollment to the selected class in the running session. Please check and recheck the admissions you have inserted because once you admit new student, you won't be able to edit further class roll section without promoting to the next session.'

Here is the admission form for the new student admission in the institution. Just fill and click add new student added just as easy.

Registering New Teacher

The screenshot shows the 'Add Teacher' page in the School Studio interface. The page title is 'School Studio'. The left sidebar contains navigation options like 'Dashboard', 'Student', 'Teacher', 'HOD', 'Parents', 'Class', 'Subject', 'Lesson Planning', 'Class Routine', 'Attendance', 'Home Work', 'Exam', 'Accounting', 'Payroll', 'Stock Management', 'Certificate', 'Library', and 'Transport'. The main content area is titled 'Add Teacher' and contains the following fields: Employee Code (text input), Name (text input), Religion (text input), Gender (dropdown), and Personal Address (Address Line 1, Address Line 2, City/Town/Village). A 'Close' button is located at the bottom right of the form.

The figure above shows the way to register new teacher, I shows the details of teacher, personal identification and educational level.

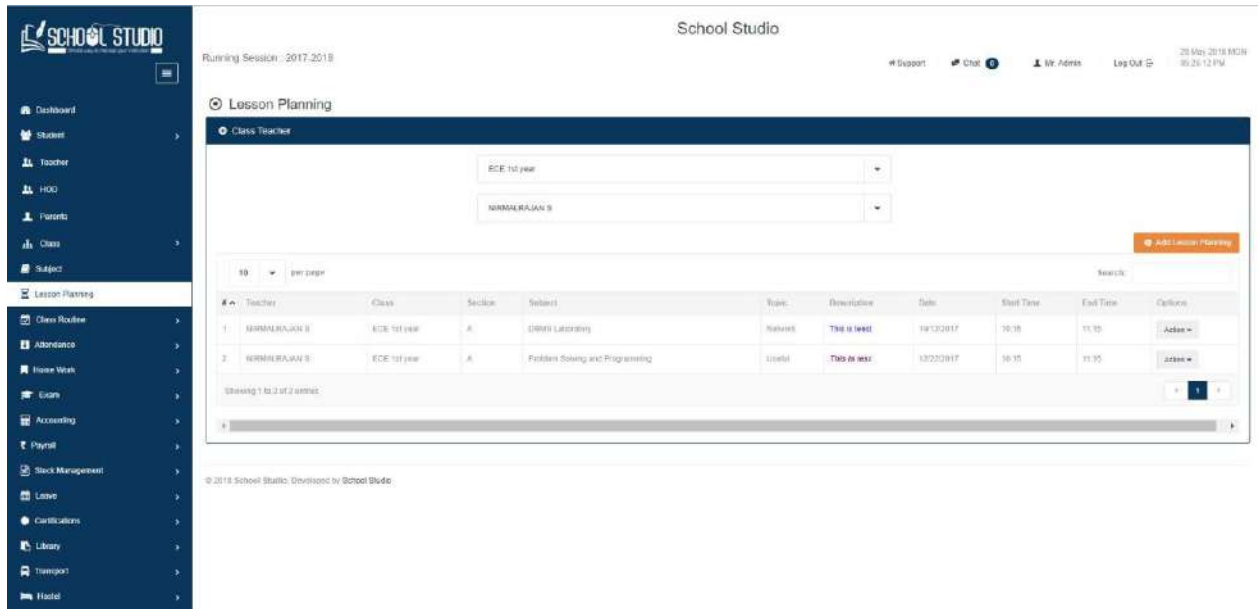

Students Promotion

The figure above shows the way to promote students promotion from a class to another class.

Class Management

The figure above shows the way to register new class, it shows the details of class, Sections on the institution.

Lesson Planning for Teachers

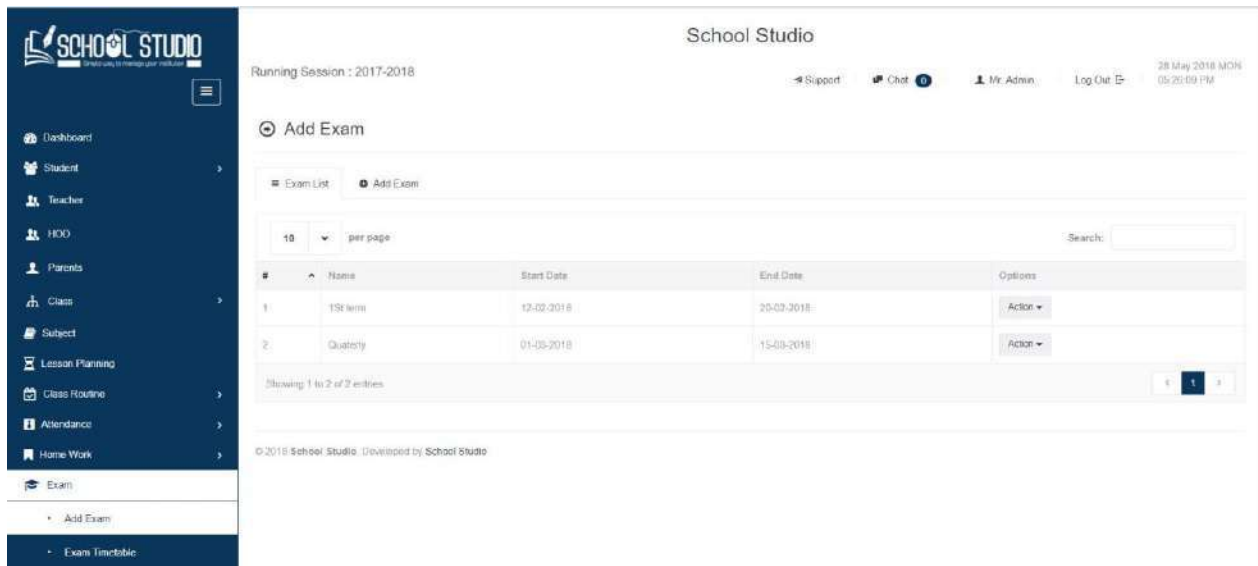

The screenshot shows the 'Lesson Planning' interface in School Studio. The top navigation bar includes the School Studio logo, 'Running Session : 2017-2018', and user options like 'Support', 'Chat', 'Mr. Admin', and 'Log Out'. The main content area is titled 'Lesson Planning' and features a 'Class Teacher' section with dropdown menus for 'ECE 1st year' and 'NIRMALAJAN S'. Below this is a table with columns for Teacher, Class, Section, Subject, Topic, Description, Date, Start Time, End Time, and Options. The table contains two entries:

#	Teacher	Class	Section	Subject	Topic	Description	Date	Start Time	End Time	Options
1	NIRMALAJAN S	ECE 1st year	A	GREEN Laboratory	Network	This is test	18/12/2017	10:15	11:15	Action
2	NIRMALAJAN S	ECE 1st year	A	Python Soving and Programming	Useful	This is test	13/22/2017	10:15	11:15	Action

Below the table, it says 'Showing 1 to 2 of 2 entries.' and includes pagination controls. The footer of the page reads '© 2018 School Studio. Developed by School Studio.'

The figure above shows the way to maintain the lesson planning for the teacher in just a click.

Exam Management

The screenshot shows the 'Add Exam' interface in School Studio. The top navigation bar is identical to the previous screenshot. The main content area is titled 'Add Exam' and features a 'Exam List' section with a table. The table has columns for #, Name, Start Date, End Date, and Options. The table contains two entries:

#	Name	Start Date	End Date	Options
1	1st term	12-02-2018	20-03-2018	Action
2	Quarterly	01-05-2018	15-08-2018	Action

Below the table, it says 'Showing 1 to 2 of 2 entries.' and includes pagination controls. The footer of the page reads '© 2018 School Studio. Developed by School Studio.'

The figure above shows the way to manage the exam timetable, exam dates, exam rooms etc in an easy way.

Accounting & Expenses Management

The screenshot displays the 'Expenses' management interface in School Studio. A modal window titled 'Add Expense' is open, allowing users to input the following details:

- Title:
- Category:
- Description:
- Amount:
- Method:
- Date:

An 'Add Expense' button is located at the bottom of the modal. The background interface shows a sidebar with 'Accounting' selected, and the main area displays a table of expenses with one entry: 'test'.

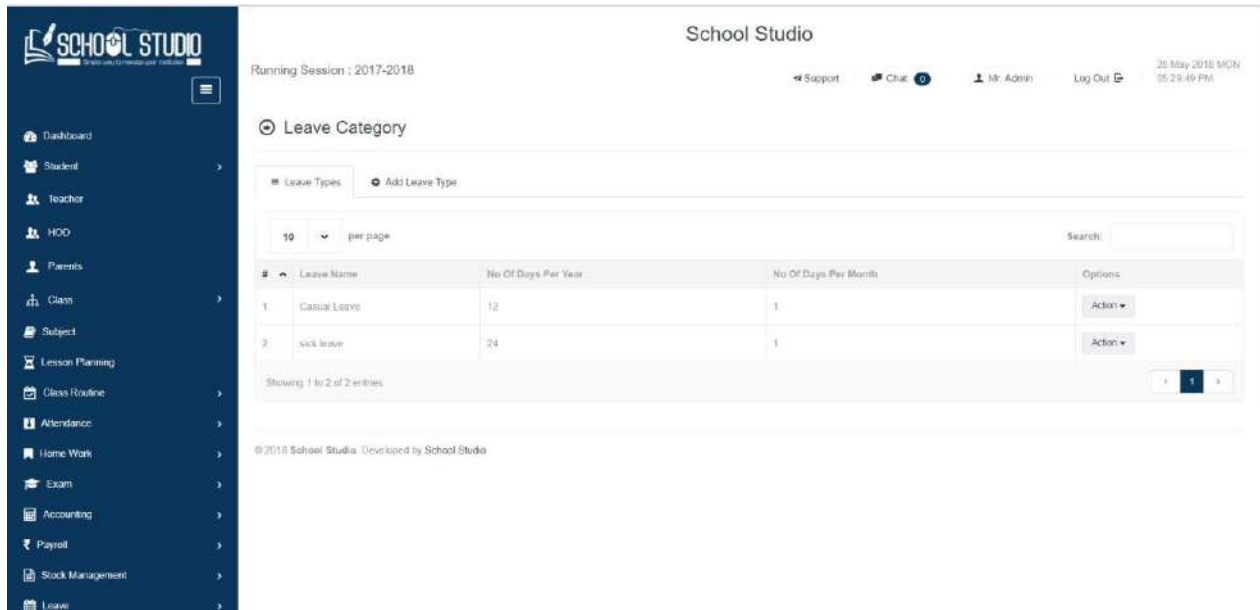

Stock Management

The screenshot shows the 'Inventory' management interface in School Studio. The 'Inventory List' tab is active, displaying a table with the following data:

#	Company Name	Category	Items	Quantity	Rate	Re Order Level	Options
1	SVK Stationary	Uniforms	sports	100	250	10	Actions

The interface includes a sidebar with 'Stock Management' selected, a search bar, and pagination controls showing 'Showing 1 to 1 of 1 entries'.

Leave Management

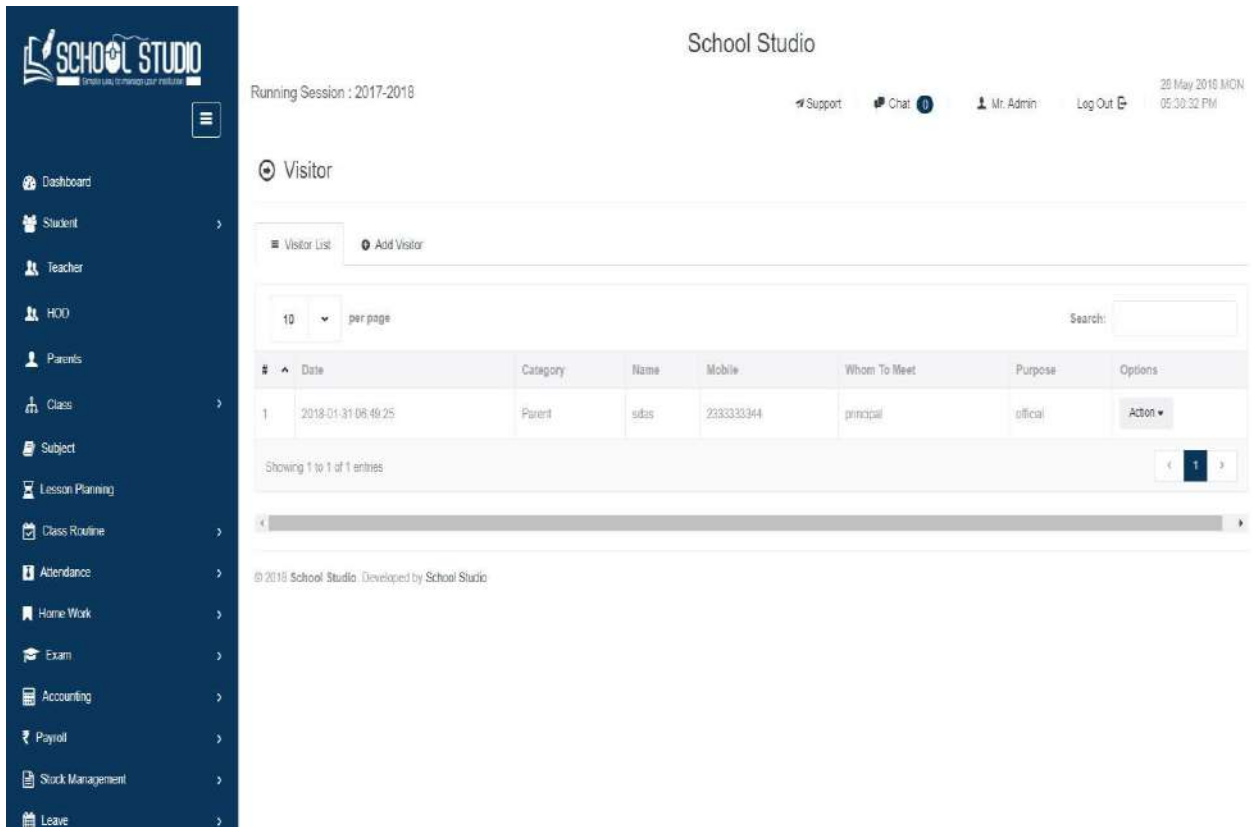

The screenshot shows the 'Leave Category' management page in School Studio. The interface includes a dark blue sidebar with navigation options like Dashboard, Student, Teacher, HOD, Parents, Class, Subject, Lesson Planning, Class Routine, Attendance, Home Work, Exam, Accounting, Payroll, Stock Management, and Leave. The main content area is titled 'Leave Category' and features a 'Leave Types' section with an 'Add Leave Type' button. Below this is a table listing existing leave types. The table has columns for 'Leave Name', 'No Of Days Per Year', 'No Of Days Per Month', and 'Options'. Two entries are visible: 'Casual Leave' with 12 days per year and 1 day per month, and 'sick leave' with 24 days per year and 1 day per month. A search bar and pagination controls (showing 1 to 2 of 2 entries) are also present.

#	Leave Name	No Of Days Per Year	No Of Days Per Month	Options
1	Casual Leave	12	1	Action
2	sick leave	24	1	Action

Certification Management

Visitor Management

The screenshot shows the 'Visitor' management page in School Studio. The interface is similar to the Leave Management page, with a dark blue sidebar and a main content area titled 'Visitor'. It features a 'Visitor List' section with an 'Add Visitor' button. Below this is a table listing visitor entries. The table has columns for 'Date', 'Category', 'Name', 'Mobile', 'Whom To Meet', 'Purpose', and 'Options'. One entry is visible: a visit on 2018-01-31 08:49:25, categorized as 'Parent', with the name 'sidas', mobile number '233333344', meeting with the 'principal', and purpose 'official'. A search bar and pagination controls (showing 1 to 1 of 1 entries) are also present.

#	Date	Category	Name	Mobile	Whom To Meet	Purpose	Options
1	2018-01-31 08:49:25	Parent	sidas	233333344	principal	official	Action

RELIABILITY

The system is very reliable due to the importance of data. School Studio satisfies all modern web security standards

Availability

The system is available 100% for the user and is used 24 hrs a day and 365 days a year. The system is operational 24 hours a day and 7 days a week.

Mean Time between Failures (MTBF)

The system is developed in such a way that it may fail once in a year.

Mean Time to Repair (MTTR)

Even if the system fails, the system will be recovered back up within an hour or less.

Accuracy

The accuracy of the system is limited by the accuracy of the speed at which the employees of the educational institute and users of the School Studio use the system.

Access Reliability

The system will provide 100% access reliability

PERFORMANCE

Response Time

The Dashboard or Information page will be able to be downloaded within a minute using a 56K modem. The information is refreshed every two minutes. The access time for a mobile device should be less than a minute. The system shall respond to the member in not less than two seconds from the time of the request submittal. The system shall be allowed to take more time when doing large processing jobs

Administrator Response

The system shall take as less time as possible to provide service to the administrator or the User.

Throughput

The number of transactions is directly dependent on the number of users, the users may be the administrator, employees of the educational institute and also students or teachers.

Capacity

The system is capable of handling large volume of users at a time.

Resource Utilization

The resources are modified according to the user requirements and also according to customization requested by the users.

The purpose of the School Studio is to manage school/College database in a systematic way. Educational institute **Administrator**, **Teacher**, **Student** and **Parent** are the users. This software is user friendly, efficient and flexible for institute database management purpose. Purpose of this software is to manage **Course**, **Batch**, **Human Resource**, **Exam**, **Student Information**, and **Timetable**, **finance**, **Transport**, **Hostel** and **Library** details in an effective manner. Also **SMS** alerts, **E-mail** alerts and messaging are some other features available in the system. **Promotion** and **Alumni** information can also be stored. It is a complete solution for handling institute records easily.

What you can expect in **SCHOOL STUDIO ERP** for all management problems at your Educational Institution.

- Unique and competitive
- Distinguishes user friendliness, features and conceptual designs
- Employs cloud computing technology
- Message communication
- Automatic report generation
- Unlimited data storage
- Easy access to information

SYSTEM PORTALS
