

SREE ABIRAAMI ARTS AND SCIENCE COLLEGE FOR WOMEN

Approved by Govt. of Tamil Nadu | Affiliated to Thiruvalluvar University

Recognized under section 2(f) of the UGC Act, 1956 | An ISO 9001:2015 Certified Institution

Katpadi Road, Keelalathur, Gudiyattam-635803. Vellore District, Tamil Nadu, India.

CO - PO Attainment Manual MAPPING COs WITH POs AND PSOs

UG Department of Computer Applications

B.C.A., Computer Applications (2020-2022)

1. Institution Vision and Mission:

Vision:

• To emerge as a renowned women institution in academic excellence, equipping students with intellectual, spiritual and emotional strength to face the global challenges.

Mission:

- To set a standard in the realm of education by combining several fields of study.
- To educate and equip women with knowledge and skills needed for successful life.
- To provide value based education that integrates arts, science and spirituality.
- To provide faculty with domain specific knowledge and ICT skills.
- To concentrate on sensitive social issues through outreach and extension activities.

2. About the Department

The Department of Computer Applications was established in the year 2017 with the objective of imparting quality education in the field of Computer Applications. With rapidly evolving technology and the continuous need for innovation, the department has always produced quality Professionals. The aim of this department is to develop core competence in Computer Science and prepare the students to carry out development work, as well as take up challenges in research. The department has very good faculty strength, who are all active learners and whose knowledge, insights and perspectives gained are transformed to keep their students fresh, topical, and timely. The driving mission for the department is to advance the frontiers of research in computer science and automation and offer world-class pedagogical and research experience to its students.

Vision

To create the most conducive environment for quality academic and technology-oriented education in Computer Science and Applications, prepare the students for a globalized technological environment and mould them to serve the society.

To empower the graduates to be technologically adept, innovative, self-motivated, responsible citizens in providing globally standard education through a conducive Teaching and learning environment which responds swiftly to the challenges of the ever-changing world.

Mission

- To impart high quality professional training at the industry level with an emphasis on basic principles of computer science and its applications.
- To impart moral and ethical values, and interpersonal skills to the students.
- To empower the students with required skills to solve the complex technological problems of modern society and provide them with a framework for promoting collaborative and multidisciplinary activities.
- To achieve academic excellence by imparting in-depth knowledge to the students through effective pedagogies and hands on training on latest tools and technologies.
- To prepare the students to be continuous learners and absorb professional skills in the connected world.
- To strengthen the industry-Academia interface, helps the graduates to emerge as leaders in academics or an inspiring revolutionary in entrepreneurship

3. Program Outcomes and Program Specific Outcomes

Program Outcomes (POs)

- PO1: Understand and apply mathematical foundation, financial accounting and domain knowledge for the conceptualization of computing models from defined problems.
- PO2: Understand, analyze and develop computer programs in the areas related to algorithm, web design and IoT for efficient design of computer based system and the young professional for a range of computer organization, techniques of Computer Networking, Software Engineering, E-Commerce, Database management, Multimedia, Artificial Intelligence, Advance Java and Computer Applications.
- PO3: Familiarity and practical competence with a broad range of programming language and open-source platforms. A project is a study of factual information for comprehending and applying the various concepts of the course into practice.
- PO4: Understand the progressive way for their future and also helps them to know the real purpose of their life. Develop sensitivity for the natural, physical and human resources in the environment.
- PO5 : Acquiring moral culture, communicative competency and potential job opportunities through learning the language subjects.

Program Specific Outcomes (PSOs)

- PSO1: In order to enhance the programming skills of the young IT professionals, the program has introduced the concept of project development in each language and technology learned during the semester. The ability to work independently on a large software project while also functioning as an effective team member.
- PSO2: After completion of the Bachelor in Computer Application, students will be able to work in IT industries, various public and private sectors etc. They will be able to work on different profiles like web developers, UI designers, testers, coders, SEO developers etc. Pursue higher studies in the area of Computer Science/Applications. Take up self-employment in Indian & global software market.

.

4. Blooms Taxonomy

Bloom's Taxonomy was developed in 1956 by educational psychologist Dr. Benjamin Bloom to promote higher forms of thinking in education, such as analyzing and evaluating concepts, processes, procedures, and principles, rather than simply memorizing facts. It is most often used when designing educational, training, and learning processes.

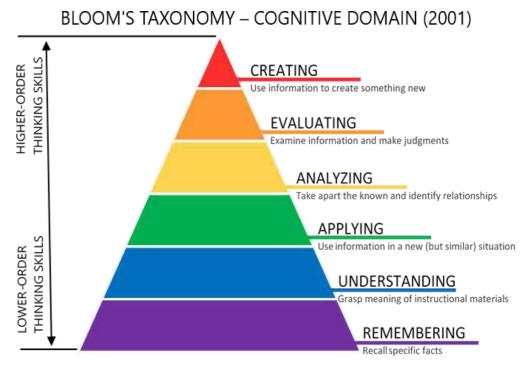

Figure 1.Pictorial representation of Blooms Taxonomy

| S. No. | Domain | Keywords | Examples |
|--------|-------------------------------|---------------------------------|-----------------------------|
| 1. | Remembering: | Defines, describes, identifies, | Recite a policy. Quote |
| | Recall or retrieve previous | knows, labels, lists, matches, | Prices from memory to a |
| | learned information. | names, outlines, recalls, | customer. Recite the safety |
| | | recognizes, and reproduces, | rules. |
| | | select, state. | |
| 2. | Understanding: | Comprehends, converts, | Rewrite the principles of |
| | Comprehending the | defends, distinguishes, | writing. Explain one's own |
| | meaning, translation, | estimates, explains, | words the steps for |
| | interpolation, and | extends, generalizes, gives an | performing a complex |
| | interpretation of instruction | example, infers, interprets, | task. Translate an equation |
| | and problem in one's own | paraphrases, predicts, | into computer spreadsheet. |
| | words. | rewrites, summarizes, | |
| | | translates | |

| 3. | Analyzing: | Analyse | Recognize logical fallacies |
|----|------------------------------|---------------------------------|-----------------------------|
| | Students being able to | Appraise Compare Contrast | in reasoning. Gathers |
| | draw connections between | Distinguish Explore Infer | information from a |
| | ideas, thinking critically, | Investigate | department and selects the |
| | to break down | in vestigate | require tasks for training. |
| | information into the sum | | require tasks for training. |
| | of its parts. | | |
| 4. | Applying: | applies, changes, computes, | students can take their |
| | Use a concept in a new | constructs, demonstrates, | knowledge and |
| | situation or unprompted | discovers, manipulates, | understanding, applying |
| | use of an abstraction. | modifies, operates, predicts, | it to different situations. |
| | Applies what was learned | prepares, produces, relates, | This usually involves |
| | in the classroom into novel | shows, solves, uses | students answering |
| | situation in the work place. | 5110 (1.5), 5511 (53), 615 (53) | questions or solving |
| | | | problems. |
| 5. | Evaluating: | appraises, compares, | Select the most effective |
| | Make judgments | concludes, contrasts, | solution. |
| | about the value of | criticizes, critiques, | Hire the most qualified |
| | ideas or | defends, describes, | candidate. |
| | materials. | discriminates, evaluates, | Explain and justify a new |
| | | explains, interprets, | budget. |
| | | justifies, relates, summarizes | C |
| | | supports | |
| 6. | Creating: | categorizes, combines, | Write a company |
| | Build a structure | compiles, composes, | operations or process |
| | or pattern from | creates, devises, designs, | manual. Design a machine |
| | diverse elements. | explains, generates, | to perform a specific task. |
| | Put parts together | modifies, organizes, | Integrates training from |
| | to form a whole, | plans, rearranges, | several sources to solve a |
| | with emphasis on | reconstructs, relates, | problem. Revises and |
| | creating a new | reorganizes, revises, | process to improve the |
| | meaning or | rewrites, summarizes, | outcome. |
| | structure. | tells, writes | |

5. Course Outcomes (COs):

Statements indicating what a student can do after completing a course successfully. Each Course has some Course Outcomes. The course content covered in each module of a course is used to define the CO statements. There could be 5 or 6 COs for each course. Bloom's Taxonomy is used to define the keywords used to define COs.

<u>SEMESTER – I</u>

Subject Name: Tamil-I Subject Code: CLT10

- CO1: மரபுக்கவிதை,புதுக்கவிதை மற்றும் கவிஞர்களைப் பற்றி அறிந்து கொள்கின்றனர்.
- CO2: உரைநடையின் தோற்றம், வளர்ச்சி நிலைகளை தெரிந்து கொள்கின்றனர்.
- CO3: நாடகத்தின் தொன்மை, வளர்ச்சி நிலைகளை பற்றி அறிந்து கொள்கின்றனர்.
- CO4: சிறுகதையின் இலக்கணம்,உத்திகளை உணர்ந்து கொள்கின்றனர்.
- CO5: அடிப்படை இலக்கணவிதிகள்,பிறமொழிச்சொற்கள் பற்றி அறிந்து கொள்கின்றனர்.

Subject Name: Communicative English I

Subject Code: CLE10

- CO1: To understand and apply communication theory.
- CO2: To critically think about communication processes and message
- CO3: To write effectively for a variety of contexts and audiences.
- CO4: To interact skillfully and ethically.
- CO5: To develop and deliver the professional presentation.

Subject Name: Programming in C

Subject Code: CCA11

- CO1: Learn the basics and introduction of computers, the structure of C, and control structures.
- CO2: Explain the concepts of derived data types such as arrays, structures, union and pointers.

 Identify the usage of arrays, functions, structures, union and pointers.
- CO3: Analyse the features of structures, union and their applications.
- CO4: Design programs involving decision structures, loops and functions.
- CO5: Enhance their programming skills in C.

Subject Name: Programming in C Lab

Subject Code: CPCA13

CO1: Understand the basic terminology used in computer programming.

CO2: Write, compile and debug programs in Language.

CO3: Create programs involving decision structures, loops, strings and functions.

CO4: Identify solution to a problem apply control structure and user defined functions for solving the problem.

CO5: Demonstrate the use of String and string handling functions.

CO6: Design programs involving structures and pointers.

Subject Name: Mathematical Foundations – I

Subject Code: CAMA15B

CO1: Ability to apply mathematical logic to solve problems.

CO2: Understand the sets, relations, functions and discrete structures.

CO3: Ability to apply binary operations.

CO4: Understand the concepts of Differentiations using to solve a simple problem using standard limits.

CO5: Able to model and solve real world problems using graphs.

Subject Name: Professional English

Subject Code: CPE10C

CO1: To develop the language skills of students by offering adequate practice.

CO2: To develop strategic competence.

CO3: To sharpen the students' critical thinking.

CO4: To help the students efficient communication for their profession.

CO5: To enhance the lexical, grammatical and Sociolinguistics communication.

<u>SEMESTER – II</u>

Subject Name: Tamil II

Subject Code: CLT20

CO1: சைவ சமயம் ,நாயன்மார்களைப் பற்றி அறிந்து கொள்கின்றனர்.

CO2: தமிழ் மொழி வளர்ச்சியில் சையவ வைணவ சமயதின் பங்கினை தெரிந்து கொள்கின்றனர்.

CO3: சிற்றிலக்கியங்களின் வளர்ச்சி நிலைகளை பற்றி அறிந்து கொள்கின்றனர்.

CO4: **தமி**ழ் மொழி வளர்ச்சியில் கிறித்துவ ,இஸ்லாமிய சமயத்தின் பங்கினை தெரிந்து கொள்கின்றனர்

CO5: பத்தொன்பதாம் நூற்றாண்டின் இலக்கிய வளர்ச்சி நிலைகளை பற்றி அறிந்து கொள்கின்றனர்.

Subject Name: Communicative English II

Subject Code: CLE20

CO1: To develop the vocabulary and improve the accuracy in grammar.

CO2: To produce words with right Pronunciation.

CO3: To improve the LSRW skills and the related sub skills.

CO4: To demonstrate positive group communication exchanges

CO5: To inculcate the spiritual and moral values from the Indian sages.

Subject Name: C++ & Data Structure

Subject Code: CCA21

CO1: Explain object-oriented concepts and describe how they are supported by C++. This includes identifying the features and peculiarities of the C++ programming language.

CO2: Apply C++ features to program design and implementation.

CO3: Analyse the concept of classes and object, array, functions, constructor and destructor.

CO4: Understand the concepts of inheritance and classification, pointer's virtual function and polymorphism.

CO5: Understand the concept of function templates and exception handling.

CO6: Learn and implement Arrays, Stacks, Queues, Linked List, Trees, Graph and various Operations.

Subject Name: C++ and Data Structures Lab

Subject Code: CPCA23

CO1: Design and implement programs using C++.

CO2: Understand the difference between the top-down and bottom-up approach.

CO3: Describe the object-oriented programming approach in connection with C++.

CO4: Illustrate the process of data file manipulations using C++.

CO5: Apply virtual and pure virtual function & complex programming situations.

CO6: Create programs for various real-world problems.

CO7: Implement an achievable practical application and analyze issues related to object-oriented techniques in the C++ programming language.

Subject Name: Mathematical Foundations - II

Subject Code: CAMA25B

CO1: Ability to use concepts in the field of data science.

CO2: Understand the concepts of linear equations based on rank methods.

CO3: Describe the concepts of integrations.

CO4: Employ the techniques and methods related to the area of data science in variety of applications.

CO5: Apply logical thinking to understand and solve the problems in context.

Subject Name: Professional English II

Subject Code: CPE20C

CO1: To make the students culturally aware of the target situation.

CO2: To concentrate on the required language skills.

CO3: Find out solutions of partial differential equation.

CO3: To make the students aware about the grammatical knowledge.

CO4: To equip the students for their professional life.

CO5: To educate the students about how to apply the LSRW in their profession.

<u>SEMESTER – III</u>

Subject Name: Programming in JAVA

Subject Code: CCA31

CO1: Understand the principles and practice of object-oriented analysis and design in the construction of robust, maintainable programs that satisfy their requirements.

CO2: Understand the basic oops concept Java evaluation and implementation overview of java.

CO3: Know operators and expressions, decision making and branching, Decision making and Looping.

CO4: Able to understand classes and methods, array strings and vectors, interface concept instead of multiple inheritances.

CO5: Packages of java, multithreaded programming contains synchronization, managing errors and exceptions handling.

CO6: Able to perform applet programming designing HTML, graphic programming.

Subject Name: E-Commerce

Subject Code: CCA32

CO 1: Understand the concepts of E-commerce and its different type and describe the network infrastructure E-commerce.

CO 2: Understand the concepts of networks and fundamentals of security concepts, services and cryptography.

CO 3: Understand the concepts of electronic payment systems and online security.

CO 4: Learn the basic fundamentals of electronic document interchange EDI and chain management process.

CO 5: Learn the concepts of internet trading relationship including inter organization and intra-organizations.

Subject Name: Operations Research

Subject Code: CCA33

CO 1: Identify and develop operational research models from the verbal description of the real system.

CO 2: Understand the mathematical tools that are needed to solve optimization problems and Transportation Assignment problem.

CO 3: Use mathematical software to solve the proposed models and sequencing problem.

CO 4: Develop a report that describes the model and the solving technique, analyze the results and propose recommendations in language understandable to the decision-making processes in Management Engineering.

CO 5: Able to understand the concepts of solve the minimal spanning tree problem, shortest route problem, maximal flow problem and minimal COt capacitated flow problem.

Subject Name: Programming in JAVA Lab

Subject Code: CPCA36

CO 1: Write Java application programs using OOP principles and proper program Structuring

CO 2: Develop Java program using packages, inheritance and interface.

CO 3: Create Multithreaded programs.

CO 4: Write Java programs to implement error handling techniques using exception handling and develop programs using class and inputs from keyboard.

CO 5: Develop graphical User Interface using AWT.

CO 6: Demonstrate event handling mechanism.

Subject Name: Financial Accounting-I

Subject Code: CAMA15C

- CO 1: Introduce the basic concepts and conversions to the students, this would help in development of accounting knowledge.
- CO 2: Understand the concepts of Double entry system this helps in preparation of various books of accounts
- CO 3: Develop the capability of students to prepare the Final Accounts of a Small Business Concern.
- CO 4: Learn the concept of single-entry system of accounting which helps them to prepare the accounts from incomplete records.
- CO 5: Enhance the Accounting Knowledge by introducing the practical uses of Average Due Date and Bank Reconciliation Statement.

Subject Name: Web Technology

Subject Code: CSCA34

- CO 1: History and development of the World Wide Web and Associated technologies.
- CO 2: The client-server architecture of the World Wide Web and its communication protocol HTTP/HTTPS.
- CO 3: Formats and languages used in modern web-pages: HTML, XHTML, CSS, XML, XSLT.
- CO 4: Programming web pages with VB Script, JavaScript and ASP.NET.
- CO 5: Design and development of web-pages and web-applications.
- CO 6: Use of web technology.
- CO 7: Retrieval of information, use of documentation and standards.

SEMESTER - IV

Subject Name: Relational Database Management Systems

Subject Code: CCA41

- CO 1: Give an introduction about DBMS, data models, a schema, E-R diagram, relational database and benefits of database.
- CO 2: Able to design a good database using normalization, decomposition and functional dependency.
- CO 3: Understand the concepts of database architecture, client server architecture, parallelism, concepts and distributed database concepts

- CO 4: Learn about indexes, sequences, data integrity, creating and maintaining tables and user privileges.
- CO 5: Understand the basic concepts of PL/SQL programming, cursors, triggers, packages, procedures, functions and transactions.

Subject Name: Enterprise Resource Planning

Subject Code: CCA42

- CO 1: Understand the functionalities of enterprise resource planning.
- CO 2: Understand characterize the ERP implementation procedures.
- CO 3: Understand the elements of ERP.
- CO 4: Understand the available ERP packages.
- CO 5: Understand the models of ERP with other related technologies.

Subject Name: Wireless Data Communications

Subject Code: CCA43

- CO1: Know the basic concepts of data communication, layered model, protocols and inter working between computer networks and switching components in telecommunication systems.
- CO 2: Understand various types of transmission media, network devices; and parameters of evaluation of performance for each media and device. Understand the routing algorithm and protocols that are used in network communications.
- CO 3: Understand the principles and operations behind various application layer protocols like HTTP, SMTP, FTP, TCP and UDP.
- CO 4: Explain the security issues related to data communication in networks. Try to tackle various information security techniques to safe guard the valuable information from one end to another.
- CO 5: Understand the functions performed by a Network Management System and to analyze connection establishment and congestion control with respect to TCP Protocol. Apply the concept of networks in various fields.

.

Subject Name: RDBMS Lab

Subject Code: CPCA46

- CO 1: Understand the principles and practice of design and implement a database schema for a given problem domain.
- CO 2: Populate and query a database using SQL, DDL and DML commands.
- CO 3: Learn Aggregate functions and Group functions.
- CO 4: Design and Implement a database query using Joins, Sub-Queries and Set Operations.
- CO 5: Learn and Implement program in SQL including Objects

(Functions, Procedures, Triggers).

Subject Name: Financial Accounting-II

Subject Code: CACM 25C

- CO 1: Understand the concepts of Branch Accounting and enable the students to prepare Accounts for various types of Branches.
- CO 2: Enhance the procedure for preparing Departmental Accounts.
- CO 3: Develop the skill of the students in preparing Hire Purchase Accounting, both in the books of Hire Purchaser and hire vendor.
- CO 4: Understand the Accounting Procedure for Partnership in cases like Admission, Retirement, Death.
- CO 5: Understand the Accounting procedure for Dissolution and Insolvency of a Partner.

Subject Name: Internet Of Things

Subject Code: CSCA44

- CO 1: Give an Introduction to IoT, M2M, IoT Architecture, IoT Model and Views, IOT protocols and Real-world design constraints enable the students to learn the concepts of IoT.
- CO 2: To Understand about the fundamentals of Internet of Things and its building blocks along their characteristics with.
- CO 3: To Understand the recent applications domains of IoT in everyday life.
- CO 4: To Understand the other associated technologies like cloud computing in the domain of IoT.
- CO 5: Train the students to build IoT systems using sensor, single board computers and open source IoT platforms.

SEMESTER -V

Subject Name: Mobile Application Development

Subject Code: CCA 51

CO 1: Learn majoring in Information Systems Technology, covers project-oriented development of applications for mobile computing devices.

CO 2: Learn how to develop mobile applications utilizing memory management, user interface design, user interface building, input methods, data handling, network techniques, URL loading, and GPS and motion sensing.

CO 3: Develop a project that produces a professional quality deployable mobile application.

CO 4: Researching the different mobile platforms (such as iPhone, Android, Windows 8) and technologies (such as a smartphone, tablet or netbook) available and comparing their strengths and weaknesses.

CO 5: Selecting the appropriate mobile platform, language, and API's (application programming interfaces) needed to produce selected professional quality mobile application.

Subject Name: OPERATING SYSTEM

Subject Code: CCA 52

CO 1: Understand the basics of operating systems like kernel, shell, types and views of operating systems

CO 2: Explain the various CPU scheduling algorithms and remove deadlocks.

CO 3: Learn various memory management techniques and concept of thrashing.

CO 4: Use disk management and disk scheduling algorithms for better utilization of external memory.

CO 5: Recognize file system interface, protection and security mechanisms.

CO 6: Explain the various features of distributed OS like Unix, Linux, windows etc.

Subject Name: Design and Analysis of Algorithms

Subject Code: CCA 53

CO 1: Interpret the performance of algorithms using analysis techniques.

CO 2: Examine the fundamental algorithmic strategies.

CO 3: Learn how to Compare the fundamental algorithmic strategies.

CO 4: Implement Graphs and trees algorithms in real time systems.

CO 5: Summarize the advance types of algorithms.

Subject Name: Mobile Applications Development-Lab

Subject Code: CPCS 56

CO 1: Researching the different mobile platforms (such as iPhone, Android, Windows 8) and technologies (such as a smartphone, tablet or netbook) available and comparing their strengths and weaknesses.

CO 2: Evaluating the strengths and weaknesses of the different programming languages (such as C++, C#, Java) that are available for the different mobile platforms.

CO 3: Identifying the different application programming interfaces (such as Google, GPS, motion sensing) that are available for the different mobile platforms and languages.

CO 4: Selecting the appropriate mobile platform, language, and API's (Application Programming Interfaces) needed to produce selected professional quality mobile application.

Subject Name: Operating System-Lab

Subject Code: CPCS 57

CO 1: Able to compare different process scheduling algorithms and interpret the concurrency problem to overcome it by using different solutions.

CO 2: Able to estimate the memory allocated for a process.

CO 3: Able to interpret the structure of a file system and disk and also able to manage them.

CO 4: Experiment with Unix commands and shell programming.

CO 5: Able to build shell program for process and file system management with system calls.

Subject Name: Data Mining

Subject Code: CECA54A

CO 1: Understand data warehousing and mining concepts. Learn fetch the data easily from large value of data.

CO 2: Understand the tools and technique of data mining. Evaluate different models used for OLAP, OLTP and data preprocessing.

CO 3: Able to apply data mining techniques in various application and its case studies.

Categorize the situations for applying different data-mining techniques: frequent pattern mining, association, correlation, classification, prediction, and cluster and outlier analysis

CO 4: Know the architecture of data ware house and its applications.

CO 5: Understand the concept of Online analytical processing (OLAP) and its implementation.

Subject Name: Software Engineering

Subject Code: CSCA 55

CO 1: Acquire strong fundamental knowledge in science, mathematics, fundamentals of computer science, software engineering and multidisciplinary engineering to begin in practice as a software engineer.

CO 2: Design applicable solutions in one or more application domains using software engineering approaches that integrate ethical, social, legal and economic concerns.

CO 3: Deliver quality software products by possessing the leadership skills as an individual or contributing to the team development and demonstrating effective and modern working strategies by applying both communication and negotiation management skill.

CO 4: Apply new software models, techniques and technologies to bring out innovative and novelistic solutions for the growth of the society in all aspects and evolving into their continuous professional development.

Subject Name: Software Engineering

Subject Code: CSCA 55

CO 1: Acquire strong fundamental knowledge in science, mathematics, fundamentals of computer science, software engineering and multidisciplinary engineering to begin in practice as a software engineer.

CO 2: Design applicable solutions in one or more application domains using software engineering approaches that integrate ethical, social, legal and economic concerns.

7CO 3: Deliver quality software products by possessing the leadership skills as an individual or contributing to the team development and demonstrating effective and modern working strategies by applying both communication and negotiation management skill.

CO 4: Apply new software models, techniques and technologies to bring out innovative and novelistic solutions for the growth of the society in all aspects and evolving into their continuous professional development.

SEMESTER-VI

Subject Name: Open Source Software

Subject Code: CCA 61

CO 1: Fundamental driving factors that created the Free and Open Source Software (F/OSS) movement.

- CO 2: Motivations for Open-Source Software Developers' participation.
- CO 3: Understand the features of OSS over Commercial software. Learn

simple shell programs using simple commands

CO 4: Apply the DDL and DML commands for their simple Applications with

MySQL as backend. Classify the usage of different operators and functions in PHP.

CO 5: Implement the web pages for manipulating files

Subject Name: Python programming

Subject Code: CCA 62

- CO 1: Modelling some real-world problems in Python and solve them.
- CO 2: Building projects in Python
- CO 3: Understanding all the foundations of Python and knowing how to apply them
- CO 4: Understanding all the Pythonic Data Structures, Objects, Functions and Modules
- CO 5: Knowing how to use Jupyter iPython Notebook for Data Science Applications
- CO 6: Foundations for Data Science: The Numpy module
- CO 7: Understanding Client-Server Architecture and Making HTTP Requests with Python.

Subject Name: Python programming Lab

Subject Code: CPCS66

CO 1: Understands basics of Python Programming language including input/output

Functions, operators, basic and collection data types

- CO 2: Implement decision making, looping constructs and functions
- CO 3: Design modules and packages built in and user defined packages
- CO 4: Implement object-oriented programming and exception handling.
- CO 5: Create files and form regular expressions for effective search operations on Strings and files.

Subject Name: Open Source Programming - Lab

Subject Code: CPCS67

- CO 1: Discuss the insights of internet programming and implement complete application over the web.
- CO 2: Demonstrate the important HTML tags for designing static pages and separate design from content using Cascading Style sheet.
- CO 3: Understand, analyze and apply the role of languages like HTML, DHTML, CSS, JavaScript and PHP.
- CO 4: Identify the environments currently available on the market to design websites.
- CO 5: Build web applications using PHP and MYSQL.

Subject Name: Cryptography

Subject Code: CECA 63B

CO 1: Know the methods of conventional encryption.

CO 2: Understand the concepts of public key encryption and number theory

CO 3: Understand various applications of cryptography and security issues practically.

CO 4: Understand the concepts of public key encryption algorithms.

CO 5: Understand the concepts of public key real time applications.

Subject Name: Artificial Intelligence

Subject Code: CECA 64A

CO 1: Able to improve human—AI interaction and real-time decision-making.

CO 2: Evaluate the advantages, disadvantages, challenges, and ramifications of human–AI augmentation.

CO 3: Design and develop symbiotic human—AI systems that balance the information processing power of computational systems with human intelligence and decision making.

CO 4: Understand the benefits, limitations, and tradeoffs of designing engaging and ethical conversational user interactions, including those supported by chat bots, smart speakers, and other AI-driven, voice-based technologies.

CO 5: Design and evaluate conversational interfaces for different users and contexts of use.

Subject Name: Object Oriented analysis and design

Subject Code: CSCA 65

CO 1: Able to design and implement projects using Object Oriented concepts.

CO 2: Use the UML analysis and design diagrams.

CO 3: Apply appropriate design patterns.

CO 4: Able to Create code from design.

CO 5: Compare and contrast various testing techniques.

CO 6: Able to Improve the techniques of problem Solving, and Critical Analysis.

CO 7: Develop principles of problem solving by computer, and the construction of appropriate algorithms for the solution of problems.

6. CO – PO and CO – PSO Mapping of Courses:

All the courses together must cover all the POs (and PSOs). For a course we map the COs to POs through the CO-PO matrix and to PSOs through the CO-PSO matrix as shown below. The various correlation levels are:

"1" – Slight (Low) Correlation

"2" – Moderate (Medium) Correlation

"3" – Substantial (High) Correlation

"-" indicates there is no correlation.

Mapping of Course Outcomes & Programme Outcomes to Programme Specific Outcomes

| | PO1 | PO2 | PO3 | PO4 | PO5 | PSO1 | PSO2 |
|-----|-----|-----|-----|-----|-----|------|------|
| CO1 | | | | | | | |
| CO2 | | | | | | | |
| CO3 | | | | | | | |
| CO4 | | | | | | | |
| CO5 | | | | | | | |
| CO6 | | | | | | | |

Correlation Level: H – High,

M- Moderate,

L-Low

6.1 Levels of Outcomes

There are four levels of outcome such as Course Outcome (CO), Program Outcome (PO), Program Specific Outcome (PSO) and Program Educational Objective (PEO). Course Outcomes are the statements that declare what students should be able to do at the end of a course. POs are definedby Accreditation Agencies of the country (NBA in India), which are the statements about the knowledge, skills and attitudes, graduate attributes of a form engineering program should have. Graduates Attributes (GAs) are the components indicative of the graduate's potential to acquirecompetence to practice at the appropriate level. Gas form a set of individually assessable outcomes of the program. The NBA laid down the graduate attributes relating to program outcomes and is to be derived by program.

The Program outcomes reflect the ability of graduates to demonstrate knowledge in fundamentals of Basic Sciences, Humanities and Social Sciences, Engineering Sciences and applythese principles in understanding and practically apply the knowledge in professional core subjects, electives and projects which enables the graduates to be competent at the time of graduation. The graduates must adhere to professional and ethical responsibilities in the pursuit of their careers and also for the benefit of the society. These outcomes also enable the graduate to pursue higher studies and engage in R&D for a successful professional career.

The proper definition and the attainment of POs contribute to the attainment of Program Educational Objectives which will help the graduate to perform his/ her duties, professional responsibilities, design, development, production and testing of novel producibility to deal withfinances and project management during his/her early professional career of 3 to 4 years.

Program Specific Outcomes are the statements that assert what the grandaunts of a specific engineering program should do what they can able to do. Program Educational Objectives are the broad statements which describe in detail about the career and professional accomplishments after significant years of graduation that the program prepare the grandaunts to achieve.

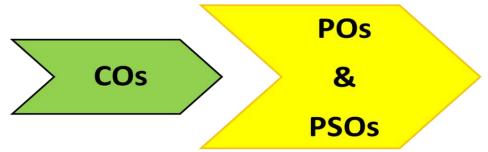

Figure 2.Relating the outcomes (Cos – POs &PSOs)

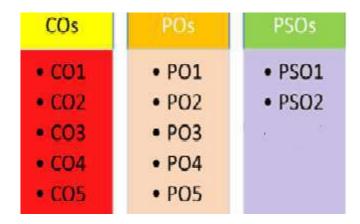

Figure 3.Relationship between COs, and POs&PSOs

The above Figure 2 and Figure 3show the building block of CO-PO&PSO relationship. After CO statements are developed by the course in-charge, CO will map with any possible PO's based on the relationship exist between them. But the PO's are not necessarily mapped with any one CO and it may be left blank. Anyhow, it ismandatory that all POs should be mapped with any one of PSOswhich are specified in the program.

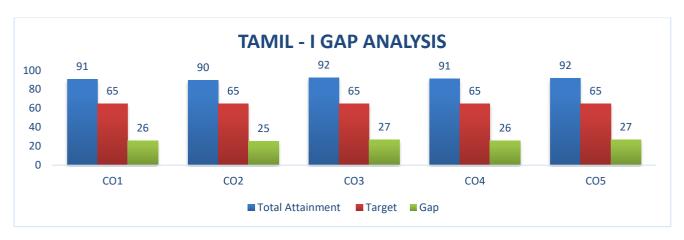

6.2 Process involved in CO-PO Mapping

The role of CO-PO mapping will be assigned to the faculty as per hierarchy followed in Figure 3. After the course (subject) allotment from the department, the course in-charge of the course has to write appropriate COs for their corresponding course. It should be narrower and measurable statements. By using the action verbs of learning levels, CO's will be designed. CO statements should describe what the students are expected to know and able to do at the end of each course, which are related to the skills, knowledge and behaviour that students will acquire through the course. After writing the CO statements, CO will be mapped with PO of the department. If the department is having more than one section in a year or the same course is available for more than one program of the same institute in a semester, the subject expert will be nominated as course coordinator of the corresponding course. The role of the course coordinator is to review the CO statements and the CO-PO mapping which has been done by course in-charge. The year wise coordinator has to consolidate the CO's of therespective year and maintain the documentation of the CO attainment level of the respective year courses as well as documentation of the individual students' extra-curricular and co-curricular activities. These details will hand over to the program coordinator in order to evaluate PO attainment of the individual student as well as individual course at the end of the fourth semester. The Program coordinator has to evaluate the PO attainment of individual student through direct and indirect method after the student completing their program.

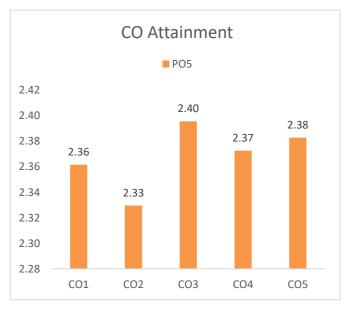

7. CO-PO Mapping

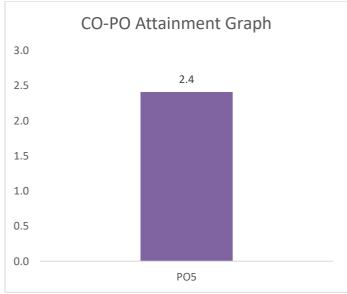

Semester - I

| SUBJECT NAME | SUBJECT CODE | SEMESTER |

8. CO-PO ASSESSMENT

8.1 Assessment Process for CO Attainment: For the evaluation and assessment of CO's and PO's, rubrics are used. The rubrics considered here are given below:

(i) CO Assessment Rubrics:

O Assessment Internal Assessment (M5% weightage) University Assessment (75% weightage) Course Outcome is evaluated based on the performance of students in internal assessments and in university examination of a course. Internal assessment contributes M5% and university assessment contributes 75% to the total attainment of a CO.

Course Outcome is evaluated based on the performance of students in internal assessments and in university examination of a course. Internal assessment contributes M5% and university assessment contributes 75% to the total attainment of a CO.

(ii) CO-Assessment Process:

Assessment Parameters: The performance of a student in each semester shall be evaluated course - wise with a maximum of 100 marks for theory course and 100 marks for laboratory.

(iii) CO Assessment Tools:

The description of Assessment tools used for the evaluation of program outcomes is given in the Table 8.1. The various assessment tools used to evaluate COs and the frequency with which the assessment processes are carried out are also listed.

In each course, the level of attainment of each CO is compared with the predefined targets, if is not the course coordinator takes necessary steps for the improvement to reach the target. With the help of CO against PO/PSO mapping, the PO/PSO attainment is calculated by the program coordinator.

Table 8.1: Evaluation of COs & POs:

(iv) Pattern of Theory course Evaluation

(a) Pattern for Internal Examinations: For theory courses of each semester there shall be three (CIA – I & II and Model) descriptive exams. CIA – I & II will be held for 90 minutes and model examination for 3 hours. These exams will be taken for the assessment of internal marks. The first internal examination will be conducted as per the plan in the academic calendar and the schedule planned by examination cell.

(b) Pattern for External End Examinations:

There shall be an external examination for every theory course and consists of three parts (Part- A, Part-B& Part - C). The duration of the time for this end examination is 3 hours.

Assessment Rubrics: An overall cut-off value is taken for all CO's commonly based on the highest mark secured and the number of students with their external mark above the cut-off value is considered for rating all CO attainments.

(v) CO-wise assessment Rubrics: Every internal question and every assignment is mapped to a specific COs. Thereafter, a CO -wise cut-off value is taken based on the highest mark secured for that CO and the number of students with their internal mark above the cutoff Value is considered for rating the CO attainment.

(vi) Quality/Relevance of Assessment Process:

Theory: Internal exams motivate students to keep up with subject content covered in class. Three written examinations are conducted and its average marks are considered. For theory subjects, during assemester there shall be M CIA examinations and one Model Examination. Each CIA examination consists of descriptive paper and one assignment. The descriptive papers CIA I and CIA II shall be for 50marks each with a total duration of 1 ½ hours and Model Examination is for 75 marks with the total duration of 3 hours. The descriptive paper pattern is given in the below table. While the CIA-I examination shall be conducted on 1 to M units of the syllabus, CIA II shall be conducted for 3 and 4 unit. And model Exam is conducted for 75 marks with whole syllabus. Ten marks (10) marks are allocated for Assignments (as specified by the subject teacher concerned).

Table 8.M: Internal test question paper set-up:

| Internal Exam | CIA I (50 marks) | CIA II (50 marks) | Model (75 marks) |
|---------------------|------------------|-------------------|------------------|
| Part – A (M marks) | MX5=10marks | MX5=10marks | MX10=M0marks |
| Part – B (5 marks) | 4X5=M0 marks | 4X5=M0 marks | 5X5=M5 marks |
| Part – C (10 marks) | MX10=M0 marks | MX10=M0 marks | 3X10=30 marks |

Assignment: The first Assignment should be submitted before the conduct of the CIA -I, the second Assignment should be submitted before the conduct of the CIA-II examination and the third Assignment should be submitted before the conduct of the model examination. The total marks secured by the student in each I and II CIA are evaluated for 50 marks and model exam for 75 marks, and the average of the three CIA examinations shall be taken as the final marks secured by each candidate. The questions in the internal examinations and assignment sheets are mapped against COsof respective course. The questions for two internal examinations and Assignments are framed in such a way to cover all Course Outcomes. The questions are framed in such a way that it should satisfy Bloom's Taxonomy, wherein each question is mapped to the appropriate course outcome of the respective course, which is evaluated based on the set attainment levels by the department.

Seminar Work Evaluation:

The subject handling faculty member would assess the technical seminar presentations by the students. She would ensure that the students choose advanced concepts in the respective areas with a lot of relevance and applicability. One seminar per student in every semester would be conducted as per the schedule mentioned in the lesson plan. The subject handling faculty member follow rubrics, which is set by the department for evaluation of seminar.

University examination: These end-semester examinations are of 3- hour duration and cover the entire syllabus of the course. It would generally satisfy all course outcomes for a particular course. The COs are evaluated based on the set attainment levels.

Project Work Evaluation:

Mini-Project: There shall be field oriented Mini-Project, in collaboration with literary field of their specialization, to be taken up during the II Semester. However, the mini-project and its report shall be evaluated along with the project work in I year II Semester. The committee consists of an external examiner, head of the department, the supervisor of the mini-project and a senior faculty member of the department. There shall be no internal marks for literary field oriented mini-project.

Presentation: The content, quality of the presentation and communication skills are assessed by the evaluation committee.

Viva-voce: At the end of the presentation, the assessment panel and the student audience ask questions and seek clarifications on specific issues related to the seminar. The effectiveness of the student's response to these queries is assessed.

Major Project: Major Project is intended to be a challenge to the intellectual and innovative abilities of students. It gives students the opportunity to synthesize and apply the knowledge and analytical skills learned in the different disciplines. Out of a total of M00 marks for the project work, 50 marks shall be allotted for Internal Evaluation and 150 marks for the End Semester Examination (Viva Voce). The End Semester Examination of the project work shall be conducted by the same committee as appointed for the University external member. The Internal Evaluation shall be on the basis of two seminars given by each student on the topic of her project. Project will enable student to think innovatively on the development of advanced literature and technologies in the field of literature. Students are expected to Perform an in-depth study of the topic assigned in light of the preliminary report prepared in the seventh semester. Review and finalise the approach to the problem. Develop a final product/ process, perform testing, arrive at results & conclusions and suggest future directions. Prepare a paper for Conference presentation/ publication, if possible. Prepare a report in the standard format for being evaluated by the Internal project Review Committee

Process for assessing the quality of Projects: The Internal project Review Committee and the project guide together will analyze the nature of the project and make sure that the work is environment friendly, ensures safety, ethics and cost effective. The projects are classified into different streams and their relevance to POs and PSOs are identified to ensure its quality.

(vii) Attainment of Program Outcomes and Program Specific Outcomes

The following are the Assessment Tools:

Several tools are described for assessing course outcomes. The program outcomes are based on the course outcomes. Thus, the tools remain the same for assessing the program outcomes. In addition, the tools of survey based on the alumni and exit surveys are considered.

- 1. The tools broadly are
- 2. End of course surveys (half yearly)
- 3. Student exit surveys
- 4. Alumni surveys yearly
- 5. Staff surveys yearly

6. Higher education and placement – student publications

(viii) Attainment Levels: Course outcomes of all courses are assessed with the help of above mentioned assessment tools and attainment level is evaluated based on set attainment rubrics as per table 8.M.If the average attainment of a particular course for two consecutive years is greater than 80% of the maximum attainment value (i.e. 80% of 3 = M.4), then for that particular course the current rubrics for attainment must be changed to analyse continuous improvement.

Table 8.3: Assessment methods and levels:

| Assessment Methods | Attainment Levels | |
|------------------------------|----------------------------------------------|---------------------------------------|
| Internal Assessment | Level 1 | 60% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level M 70% of students scoring more than 40 | |
| | | marks in internal assessment tools |
| | Level 3 | 70% of students scoring more than 40% |
| | | marks in internal assessment tools |
| University Assessment | Level 1 | 60% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level M | 70% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level 3 | 75% of students scoring more than 40% |
| | | marks in internal assessment tools |

(ix) Validation of CO-PO mapping

Step 1: Obtain course outcome.

Step M: Mapping of course outcome with program

outcome.Step 3: Setting weightage for CO assessment.

Step 4: CO measurement through assessment.

Step 5: Obtain CO attainment table through direct and indirect assessment methods.

Step 6: Obtain PO attainment table through direct and indirect assessment methods.

With the CO-PO Mapping, we have attained and fulfilled the curriculum of the University with certain lacking which states that we will show our progress in the upcoming attainments.

(x) Assessment and Attainment methods:

Assessment is one or more processes which is carried out by the institution, that identify, collect and prepare data to evaluate the achievement of course outcomes and program outcomes. Attainment is the action or fact of achieving a standard result towards accomplishment of desired goals. Primarily attainment is the standard of academic attainment as observed by test and/or examination result. Assessment methods are categorized into two as direct method and indirect method to access CO's and PO's. The direct methods display the student's knowledge and skills from their performance in the continuous internal assessment tests, semester examinations and supporting activities such as seminars, assignments, case study, group discussion, online quiz, mini project etc., These methods provide a sampling of what students know and/or can do and provide strong evidence of student learning. The indirect method done through surveys and interviews; it asks the stakeholders to reflect their views on student's learning. The institute assesses opinions or thoughts about graduate's knowledge or skills by different stakeholders.

CO assessment methods are employed

Direct assessment method and indirect assessment method are considered for 90% and 10% weightages respectively.

Internal test assessment and end semester examination assessment are considered with the weightage of M5% and 75% respectively for the direct assessment of CO.

(xi) Procedure for Attainment of Program Outcomes

At the end of the each programme, the PO/PSO assessment is done from the CO attainment of all curriculum components. As per NAAC guidelines, program can appropriately define the attainment level. The attainment level may be set by the particular program or commonly by the institution. The attainment can be made as best the choice by the institution or the program by analyzing the students' knowledge. This can be achieved by using different supporting activities. This attainment is mainly for the purpose of making an esteemed graduates with good analytical, practical and theoretical knowledge about the program by attaining the PEO's and PSO's of the program and the institution. For the evaluation and assessment of COs and POs, rubrics are used. The rubrics considered here are given below:

Attainment Level 1: 60% of students score more than 40% marks out of the maximum relevant marks.

Attainment Level M: 70% of students score more than 40% marks out of the maximum relevant marks.

Attainment Level 3: 75% of students score more than 40% marks out of the maximum relevant marks.

(xii). Indirect Assessment Tools and Process:

Indirect assessment is done through program exit survey, alumni survey and employer survey where program exit survey and employer survey are given a weightage of M5% each and alumni survey is given a weightage of 50%.

1. Graduate Exit Survey:

A exit survey is conducted for students who have graduated out of the department for that year.

(i) Questionnaire Format

Kindly rate the following criteria on a scale of 1-5. Your genuine response will be helpful for the continuous quality improvement of our UG programme in ECE.

5.Excellent

4. Very Good

3. Good

2.Average

1. Poor

(ii) Evaluation Process

The questionnaire consists of 8 questions which is relevant for assessing each PO and PSO. Each question is having 5 options namely Excellent, Very Good, Good, Average and Poor, which is given marks 5,4,3,M,1 respectively. These survey results are tabulated and the average values corresponding to each PO and PSO are determined.

2. Alumni Survey:

Feedback is taken from alumni.

(i) Questionnaire Format

Kindly rate the following criteria on a scale of 1-5. Your genuine response will be helpful for the continuous quality improvement of our UG programme in ECE.

5.Excellent

4. Very Good

=

3. Good

2.Average

1. Poor

+

(ii) Evaluation Process

The questionnaire consists of 9 questions which is relevant for assessing each PO and PSO. Each question is having 5 options namely Excellent, Very Good, Good, Average and Poor, which is given marks 5,4,3,M,1 respectively. These marks are tabulated and the average values corresponding to each PO and PSO are determined.

Indirect Attainment

50% attainment of Graduate Exit survey +

50% attainment of Alumni survey

Overall Attainment of PO

90% of Direct Attainment of each PO

10% Indirect Attainment of each PO

73

1. Institution Vision and Mission:

Vision:

• To emerge as a renowned women institution in academic excellence, equipping students with intellectual, spiritual and emotional strength to face the global challenges.

Mission:

- To set a standard in the realm of education by combining several fields of study.
- To educate and equip women with knowledge and skills needed for successful life.
- To provide value based education that integrates arts, science and spirituality.
- To provide faculty with domain specific knowledge and ICT skills.
- To concentrate on sensitive social issues through outreach and extension activities.

2. About the Department

The department of Mathematics was established with UG programme B.Sc. Mathematics in the year 2016. Since, mathematics is highly relevant for science, commerce and management courses, the PG programme M.Sc., Mathematics was added in the department during the academic year 2019-2020. The department pedagogical practices include classroom interactions, poster presentation, paper presentation, quiz, guest lectures, seminars and conferences etc.

"The Department goal is to produce the student has self-dependent, well-equipped, knowledgeable for higher education and research in Mathematics"

Objectives:

- To equip the students with deep subject knowledge and talents to become as mathematical professionals.
- To guide them for pursuing higher studies.
- To train the students evolving the solutions for the problems faced by environment through knowledge of mathematics and scientific computational techniques.
- To identify the slow learners and gives special training to change them on par with regular students. Similarly, advanced learners are given extra coaching to focus on research.
- To produce university rank holders.

Vision

- To transform young minds to be competent and motivated professionals to the development of the Nation.
- To emerge the best mathematics department in National level and establish the best research centre

Mission

- To provide a supportive environment, where students can learn and become experts in mathematics, through dedicated teaching and motivation.
- To develop the students as mathematical thinkers, enable them to become lifelong learners, and continue to grow in their chosen professions.

3. Program Outcomes and Program Specific Outcomes

Program Outcomes (POs)

- PO1: Inculcate critical thinking to carry out scientific investigation objectively without being biased with preconceived notions.
- PO2: Equip the students with skills to analyse problems, formulate an hypothesis, evaluate an validate results, and draw reasonable conclusions thereof.
- PO3: Prepare students for pursing research or careers in industry in mathematical science and allied fields.
- PO4: Imbibe effective scientific and /or technical communications in both oral and writing
- PO5 : Continue to acquire relevant knowledge and skills appropriate to professional activities and demonstrate highest standards of ethical issues in mathematical sciences.

Program Specific Outcomes (PSOs)

PSO1: Develop Proficiency in the analysis of complex physical problems and the use of mathematical or other appropriate techniques to solve them.

PSO2: Solve Complex Problems by critical understanding, analysis and synthesis.

4. Blooms Taxonomy

Bloom's Taxonomy was developed in 1956 by educational psychologist Dr. Benjamin Bloom to promote higher forms of thinking in education, such as analyzing and evaluating concepts, processes, procedures, and principles, rather than simply memorizing facts. It is most often used when designing educational, training, and learning processes.

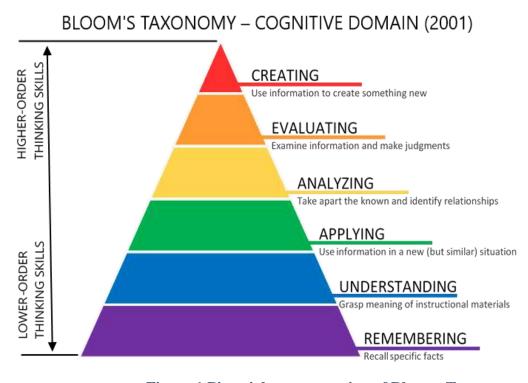

Figure 1.Pictorial representation of Blooms Taxonomy

| S. No. | Domain | Keywords | Examples |
|--------|-------------------------------|---------------------------------|-----------------------------|
| 1. | Remembering: | Defines, describes, identifies, | Recite a policy. Quote |
| | Recall or retrieve previous | knows, labels, lists, matches, | Prices from memory to a |
| | learned information. | names, outlines, recalls, | customer. Recite the safety |
| | | recognizes, and reproduces, | rules. |
| | | select, state. | |
| 2. | Understanding: | Comprehends, converts, | Rewrite the principles of |
| | Comprehending the | defends, distinguishes, | writing. Explain one's own |
| | meaning, translation, | estimates, explains, | words the steps for |
| | interpolation, and | extends, generalizes, gives an | performing a complex |
| | interpretation of instruction | example, infers, interprets, | task. Translate an equation |
| | and problem in one's own | paraphrases, predicts, | into computer spreadsheet. |
| | words. | rewrites, summarizes, | |
| | | translates | |

| 3. | Analyzing: | Analyse | Recognize logical fallacies |
|----|------------------------------|--------------------------------|-----------------------------|
| | Students being able to | Appraise Compare Contrast | in reasoning. Gathers |
| | draw connections between | Distinguish Explore Infer | information from a |
| | ideas, thinking critically, | Investigate | department and selects the |
| | to break down | - | require tasks for training. |
| | information into the sum | | |
| | of its parts. | | |
| 4. | Applying: | applies, changes, computes, | students can take their |
| | Use a concept in a new | constructs, demonstrates, | knowledge and |
| | situation or unprompted | discovers, manipulates, | understanding, applying |
| | use of an abstraction. | modifies, operates, predicts, | it to different situations. |
| | Applies what was learned | prepares, produces, relates, | This usually involves |
| | in the classroom into novel | shows, solves, uses | students answering |
| | situation in the work place. | | questions or solving |
| | 1 | | problems. |
| 5. | Evaluating: | appraises, compares, | Select the most effective |
| | Make judgments | concludes, contrasts, | solution. |
| | about the value of | criticizes, critiques, | Hire the most qualified |
| | ideas or | defends, describes, | candidate. |
| | materials. | discriminates, evaluates, | Explain and justify a new |
| | | explains, interprets, | budget. |
| | | justifies, relates, summarizes | |
| | | supports | |
| 6. | Creating: | categorizes, combines, | Write a company |
| | Build a structure | compiles, composes, | operations or process |
| | or pattern from | creates, devises, designs, | manual. Design a machine |
| | diverse elements. | explains, generates, | to perform a specific task. |
| | Put parts together | modifies, organizes, | Integrates training from |
| | to form a whole, | plans, rearranges, | several sources to solve a |
| | with emphasis on | reconstructs, relates, | problem. Revises and |
| | creating a new | reorganizes, revises, | process to improve the |
| | meaning or | rewrites, summarizes, | outcome. |
| | structure. | tells, writes | |

5. Course Outcomes (COs):

Statements indicating what a student can do after completing a course successfully. Each Course has some Course Outcomes. The course content covered in each module of a course is used to define the CO statements. There could be 5 or 6 COs for each course. Bloom's Taxonomy is used to define the keywords used to define COs.

<u>SEMESTER – I</u>

Subject Name: Algebra – I

Subject Code: DMA11

CO1 :To introduce the concepts and to develop working knowledge on class equations.

CO2: To introduce sylow's theorem and finite abelian groups.

CO3: Recognize and learnt about different linear transformations.

CO4: Understand about Trace and transpose.

CO5: Gain knowledge about real quadratic forms.

Subject Name: Real Analysis - I

Subject Code: DMA12

CO1: Understanding basic concepts of real analysis like open set, closed set, bounded set, and continuous functions.

CO2: Learn to work with functions of bounded variations.

CO3: Introduction of Riemann integral and Riemann stieltjes integration.

CO4: To provide knowledge on convergence of infinite series and different types of convergence teSts.

CO5 : Analysing concepts of infinite product and uniform converges and its interplay between various limiting operations.

Subject Name: Ordinary Differential Equataions

Subject Code: DMA13

CO1: Remembered about basic concepts of linear differential equations.

CO2: To develop knowledge on finding solutions to linear differential equations with constant and variable coefficients.

CO3: To increase understanding n finding linear differential equations with singular points.

CO4: Introduction on initial value problems and wronskian.

CO5: Learnt about second order equation and concepts of Euler equations and Bessel functions.

Subject Name : Mechanics (ELECTIVE)

Subject Code: DEMA14B

CO1: To study mechanical system under generalized coordinate system.

CO2: Study the detail of virtual work.

CO3: Study energy and momentum.

CO4: Study the concept of Hamilton, Lagrange.

CO5: It allows humans to perform tasks much easier in terms of the force they need to apply.

Subject Name: Public Speaking and Creative Writing

Subject Code: DOEN16C

CO1: The students will learn how to appreciate and analyse the poem

CO2: The students will get an idea of how to write poem

CO3: The students will receive the adequate knowledge about the paragraph writing

CO4: The student will become good writer after getting the ideas about the writing methods

CO5 : The student will be able to know how to differentiate between fixion and non – fixtional Writings

SEMESTER - II

Subject Name: Algebra – II

Subject Code : DMA21

CO1: To study field extension, roots of polynomials Galois theory, finite fields division rings.

CO2: Solvability by radicals helps to develop computational skill in abstract.

CO3: Be able to write and understand basic proofs.

CO4: Develop and solve problem solving skills.

CO5: Use mathematical ideas to model real world problems.

Subject Name: Real Analysis – II

Subject Code: DMA22

CO1: It has developed and formalise he study of numbers d functions to investigate important concept such as limits and continuity.

CO2: It have followed to stochastic process are used in finance, trading computer and network simulations, modelling manufacturing quality control etc.

CO3 : To introduce measure on the real line, lebesgue measurability and integrability, Fourier series and integrals, in depth study in multivariate calculus.

CO4: It helped to do machine learning in data science.

CO5: It gives analysis of problems which it gives good solution.

Subject Name: Partial Differential Equataions

Subject Code: DMA23

CO1: The aim of the course is to introduce to the students to the various types of partial differential equations and how to solve these equations.

CO2: It used of the propagation of heat (or) sound, fluid flow, elasticity, electrostatics, electrodynamics.

CO3: It have a remarkable ability to predict the world around us.

CO4: It localizes the relationships of a system and many problems are simple as a result of that localization.

CO5: It given the models such as these are executed toestimate other more complex situations.

Subject Name : Difference Equations (ELECTIVE)

Subject Code: DEMA24C

CO1 : Know the important theorems and their applications.

CO2: Find out the solution & second order difference equations by successive calculations.

CO3: Find out solutions of partial differential equation.

CO4 : Solve constant coefficient of linear difference equations using z-transforms.

CO5: Understand the concept of asymptotic methods.

Subject Name: Journalism and Mass Communications

Subject Code: DOEN25C

CO1: The students can learn about the history and ideologies of the print media

CO2: The characteristics of the news paper is introduced to the learners

CO3: The learners can acquaint the technics and writings of the print media

CO4: The importance of the mass media in the society can be understood by the readers

Subject Name: Human Rights (COMPULSORY PAPER)

Subject Code: DHR20

CO1: This concept of subject gives to equality and fairness.

CO2: It recognise our freedom to make choices about our lives and to develop our potential as human beings.

CO3: Living a life free from fear, harassment or discrimination.

CO4: It has ensure people have basic ned met.

CO5: It has ported vulnerable groups from abuse.

<u>SEMESTER – III</u>

Subject Name : Complex Analysis - I

Subject Code: DMA31

CO1: Understand the differentiability and analytic functions.

CO2 : Comprehend the elementary functions and complex integrations.

CO3: Acquire the knowledge of conformal mapping and Mobius transformations.

CO4: Discuss the maximum principle, schwarz lemma and liouvilles.

CO5: Procure the applications of classification of singularities.

Subject Name: Topology Subject Code: DMA32

CO1: Know the basics of open and closed sets and the significance of the topological spaces.

CO2: Comprehend the continuous functions on topological space, product topology

CO3: Understand the connected spaces, connected subspaces, components and local connectedness.

CO4 : Acquire the notions of compactness compact subspaces, limit points compactness and local compactness.

CO5: Understand the various countability axioms and the separations.

Subject Name: Differntial Geometry

Subject Code: DMA33

CO1: Given introduction to space curves.

CO2: Learnt the concepts of space curves intrinsic properties of a surface.

CO3: Provided knowledge on geodesics.

CO4: Understand about Gaussian curvature and surface of constant curvature.

CO5 : Explored the concepts of non – intrinsic properties of surface.

Subject Name : Operations Research (ELECTIVE)

Subject Code: DEMA34C

CO1: Understand the concept of statistical decision theory and to reveal the logical structure of the problem, states of nature and likely pay – offs from each outcome.

CO2 : Identify and develop operational research models from the verbal descriptions of the real system.

CO3: Develop a report that describes the model and the solving technique, analyse the results

and purpose in decision making.

Subject Name: Soft Skills Subject Code: DOEN36A

CO1: The students recap the language skills, grammer, vocabulary, phrase, clause and sentences

CO2: The learner can built his fluency gradually

CO3: The students acquaint with LSRW skills and can also develop his non – verbal communications

CO4: The students are thought about the learning etiquettes

CO5: The students can also learn about the importance of business etiquette

SEMESTER – IV

Subject Name: Complex Analysis – II

Subject Code: DMA41

CO1: To learn basic algebraic properties of complex numbers and limit of continuity of complex functions.

CO2: To learn analytic function and the C-R equations.

CO3: To learn tools which are useful in finding integration of complex valued function.

CO4 : This courses involved complex number, properties of them , analytic functions, residues, fundamental theorem.

CO5 : Upon completion of this unit the student will be able to understand residue theorem, the augment principle.

Subject Name: Fluid Dynamics

Subject Code: DMA42

CO1: Understand the concepts of kinematics and fluids in motion.

CO2: Analyse the examples related to the equation of continuity and acceleration of fluid.

CO3 : Discuss two – dimensional flows, the stream function and Milnes Thompson circle theorem.

CO4: Acquire the concept of three dimensional flows and derive stoke's stream function.

CO5: Discuss the viscous flows and Naiver stokes equations of motion of a viscous fluid.

Subject Name: Functional Analysis

Subject Code: DMA43

CO1 : Describe the properties of normal linear space and construct example of such spaces.

CO2 : Apply basic theoretical techniques to analyse linear functionals and operators on Banach and Hilbert spaces.

CO3: Apply orthonormality to Fourier series of functions.

CO4: Apply theorems to do problems.

Subject Name: Number Theory And Cryptography (ELECTIVE)

Subject Code: DEMA44A

CO1: Understand the basic concept of cryptography and network security their mathematical models.

CO2: Understand mathematical foundation required for various cryptographic algorithms, identify and classify computer and security threats.

CO3: Describe and analyse existing authentication protocals for two party communications.

CO4: Examine the issues and structure of authentication service.

CO5 : Develop a security model to prevent detect and recover from attacks.

Subject Name: English for Media (OPEN – ELECTIVE NON – MAJOR)

Subject Code: DOEN45B

CO1 : The students is introduced to essence of the mass media and its definitions and its function.

CO2: The learner learns the news analysis and its types

CO3: In this the learners knows about the review, editorial columns, etc.,

CO4: Different kinds of reports are thought like election, crime report etc.,

CO5: Writing and editing of T.V, Radio etc., is thought the learners.

6. CO – PO and CO – PSO Mapping of Courses:

All the courses together must cover all the POs (and PSOs). For a course we map the COs to POs through the CO-PO matrix and to PSOs through the CO-PSO matrix as shown below. The various correlation levels are:

"1" – Slight (Low) Correlation

"2" – Moderate (Medium) Correlation

"3" – Substantial (High) Correlation

"-" indicates there is no correlation.

Mapping of Course Outcomes & Programme Outcomes to Programme Specific Outcomes

| | PO1 | PO2 | PO3 | PO4 | PO5 | PSO1 | PSO2 |
|-----|-----|-----|-----|-----|-----|------|------|
| CO1 | | | | | | | |
| CO2 | | | | | | | |
| CO3 | | | | | | | |
| CO4 | | | | | | | |
| CO5 | | | | | | | |
| CO6 | | | | | | | |

Correlation Level: H – High, M- Moderate, L-Low

6.1 Levels of Outcomes

There are four levels of outcome such as Course Outcome (CO), Program Outcome (PO), Program Specific Outcome (PSO) and Program Educational Objective (PEO). Course Outcomes are the statements that declare what students should be able to do at the end of a course. POs are defined by Accreditation Agencies of the country (NBA in India), which are the statements about the knowledge, skills and attitudes, graduate attributes of a formaengineering program should have. Graduates Attributes (GAs) are the components indicative of the graduate's potential to acquire competence to practice at the appropriate level. Gas form a set of individually assessable outcomes of the program. The NBA laid down the graduate attributes relating to program outcomes and is to be derived by program.

The Program outcomes reflect the ability of graduates to demonstrate knowledge in fundamentals of Basic Sciences, Humanities and Social Sciences, Engineering Sciences and apply these principles in understanding and practically apply the knowledge in professionalcore subjects, electives and projects which enables the graduates to be competent at the time of graduation. The graduates must adhere to professional and ethical responsibilities in the pursuit of their careers and

also for the benefit of the society. These outcomes also enable the graduate to pursue higher studies and engage in R&D for a successful professional career.

The proper definition and the attainment of POs contribute to the attainment of Program Educational Objectives which will help the graduate to perform his/ her duties, professional responsibilities, design, development, production and testing of novel producability to deal with finances and project management during his/her early professional career of 3 to 4 years.

Program Specific Outcomes are the statements that assert what the grandaunts of a specific engineering program should do what they can able to do. Program Educational Objectives are the broad statements which describe in detail about the career and professional accomplishments after significant years of graduationthat the program prepare the grandaunts to achieve.

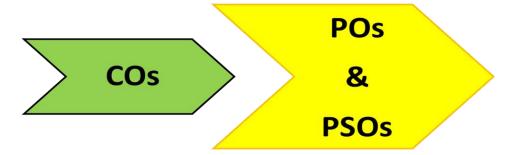

Figure 2.Relating the outcomes (Cos – POs &PSOs)

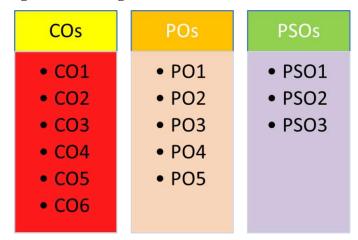

Figure 3.Relationship between COs, and POs&PSOs

The above Figure 2 and Figure 3show the building block of CO-PO&PSO relationship. After CO statements are developed by the course in-charge, CO will map with any possible PO's based on the relationship exist between them. But the PO's are not necessarily mapped with any one CO and it may be left blank. Anyhow, it ismandatory that all POs should be mapped with any one of PSOswhich are specified in the program.

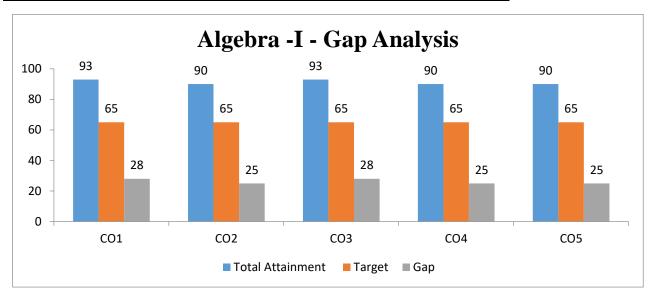

6.2 Process involved in CO-PO Mapping

The role of CO-PO mapping will be assigned to the faculty as per hierarchy followed in Figure 3. After the course (subject) allotment from the department, the course in-charge of the course has to write appropriate COs for their corresponding course. It should be narrower and measurable statements. By using the action verbs of learning levels, CO's will be designed. CO statements should describe what the students are expected to know and able to do at the end of each course, which are related to the skills, knowledge and behaviour that students will acquire through the course. After writing the CO statements, CO will be mapped with PO of the department. If the department is having more than one section in a year or the same course is available for more than one program of the same institute in a semester, the subject expert will be nominated as course coordinator of the corresponding course. The role of the course coordinator is to review the CO statements and the CO-PO mapping which has been done by course in-charge. The year wise coordinator has to consolidate the CO's of the respective year and maintain the documentation of the CO attainment level of the respective year courses as well as documentation of the individual students' extra-curricular and co-curricular activities. These details will hand over to the program coordinator in order to evaluate PO attainment of the individual student as well as individual course at the end of the fourth semester. The Program coordinator has to evaluate the PO attainment of individual student through direct and indirect method after the student completing their program.

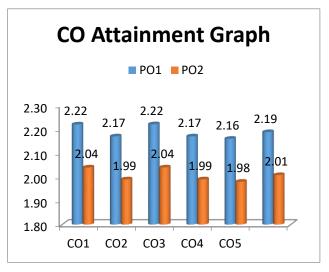

7. CO-PO Mapping

8. CO-PO ASSESSMENT

8.1 Assessment Process for CO Attainment: For the evaluation and assessment of CO's and PO's, rubrics are used. The rubrics considered here are given below:

(i) CO Assessment Rubrics:

O Assessment Internal Assessment (25% weightage) University Assessment (75% weightage)Course Outcome is evaluated based on the performance of students in internal assessments and in university examination of a course. Internal assessment contributes 25% and university assessment contributes 75% to the total attainment of a CO.

Course Outcome is evaluated based on the performance of students in internal assessments and in university examination of a course. Internal assessment contributes 25% and university assessment contributes 75% to the total attainment of a CO.

(ii) CO-Assessment Process:

Assessment Parameters: The performance of a student in each semester shall be evaluated course wise with a maximum of 100 marks for theory course and 100 marks for laboratory.

(iii) CO Assessment Tools:

The description of Assessment tools used for the evaluation of program outcomes is given in the Table 8.1. The various assessment tools used to evaluate COs and the frequency with which the assessment processes are carried out are also listed.

In each course, the level of attainment of each CO is compared with the predefined targets, if is not the course coordinator takes necessary steps for the improvement to reach the target. With the help of CO against PO/PSO mapping, the PO/PSO attainment is calculated by the program coordinator.

Table 8.1: Evaluation of COs & POs:

| Mode of | Assessment | Description | Evaluation of Course | Related | Frequency |
|----------|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|---------------------------------------------------------|
| Assessme | Tool | | Outcomes | POs/PSOs | of |
| nt | | | | | Assessment |
| Direct | Theory Internal Examinations | Three Written examinations are conducted and its average are evaluated | The questions in the internal examinations and assignment sheets are mapped against COs of respective course. The questions for two internal examinations and assignments are framed in such a way to cover all course outcomes. | PO1 to PO5, PSO1 &PSO2 | Three per semester |
| Direct | Assignments | Three assignments are given for each course for continuous assessment average marks are considered | The final attainment for each CO under direct assessment is calculated by taking from average of the CO attainments Internal Examinations and Assignments | PO1 to PO5, PSO1 & PSO2 | Continuous |
| Direct | Assignment | The day to day evaluation is considered | The final attainment of each CO is calculated by taking average of the % attainment from day to day evaluation and Internal examination | PO1 to PO5, PSO1 & PSO2 | Continuous |
| Direct | Field oriented Project | To test students concepts in design, creative thinking and independent analysis. Two project reviews are conducted | Two internal project reviews are conducted and average of these two review assessments are conducted | PO1 to PO5, PSO1 & PSO2 | One project review is conducted in IV semester |
| Direct | Comprehensi ve Viva-voce Examination | To assess the student's technical and | The assessment is carried out by HoD and three senior Faculty | PO1 to PO5, PSO1 & PSO2 | IV semester |

| analytical | members along with | |
|--------------|-----------------------|--|
| skills with | students overall | |
| communicatio | academic performance. | |
| n skills | | |

(iv) Pattern of Theory course Evaluation

(a) Pattern for Internal Examinations: For theory courses of each semester there shall be three (CIA – I & II and Model) descriptive exams. CIA – I & II will be held for 90 minutes and model examination for 3 hours. These exams will be taken for the assessment of internal marks. The first internal examination will be conducted as per the plan in the academic calendar and the schedule planned by examination cell.

(b) Pattern for External End Examinations:

There shall be an external examination for every theory course and consists of three parts (Part-A,Part-B& Part - C). The duration of the time for this end examination is 3 hours.

Assessment Rubrics: An overall cut-off value is taken for all CO's commonly based on the highest mark secured and the number of students with their external mark above the cut-off value is considered for rating all CO attainments.

(v) CO-wise assessment Rubrics: Every internal questions and every assignment is mapped to a specific COs. Thereafter, a CO -wise cut-off value is taken based on the highestmark secured for that CO and the number of students with their internal mark above the cutoff Value is considered for rating the CO attainment.

(vi) Quality/Relevance of Assessment Process:

Theory: Internal exams motivate students to keep up with subject content covered in class. Three written examinations are conducted and its average marks are considered. For theory subjects, during a semester there shall be 2 CIA examinations and one Model Examination. Each CIA examination consists of descriptive paper and one assignment. The descriptive papers CIA I and CIA II shall be for 50marks each with a total duration of 1 ½ hours and Model Examination is for 75 marks with the total duration of 3 hours. The descriptive paper pattern is given in the below table. While the CIA-I examination shall be conducted on 1 to 2 units of the syllabus, CIA II shall be conducted for 3 and 4 unit. And model Exam is conducted for 75 marks with whole syllabus. Ten marks (10) marks are allocated for Assignments (as specified by the subject teacher concerned).

Table 8.2: Internal test question paper set-up:

| Internal Exam | CIA I (50 marks) | CIA II (50 marks) | Model (75 marks) |
|---------------------|------------------|-------------------|------------------|
| Part – A (2 marks) | 2X5=10marks | 2X5=10marks | 2X10=20marks |
| Part – B (5 marks) | 4X5=20 marks | 4X5=20 marks | 5X5=25 marks |
| Part – C (10 marks) | 2X10=20 marks | 2X10=20 marks | 3X10=30 marks |

Assignment: The first Assignment should be submitted before the conduct of the CIA -I, the second Assignment should be submitted before the conduct of the CIA-II examination and the third Assignment should be submitted before the conduct of the model examination. The total marks secured by the student in each I and II CIA are evaluated for 50 marks and model exam for 75 marks, and the average of the three CIA examinations shall be taken as the final marks secured by each candidate. The questions in the internal examinations and assignment sheets are mapped against COs of respective course. The questions for two internal examinations and Assignments are framed in such a way to cover all Course Outcomes. The questions are framed in such a way that it should satisfy Bloom's Taxonomy, wherein each question is mapped to the appropriate course outcome of the respective course, which is evaluated based on the set attainment levels by the department.

Seminar Work Evaluation:

The subject handling faculty member would assess the Technical seminar presentations by the students. She would ensure that the students choose advanced concepts in the respective areas with a lot of relevance and applicability. One seminar per student in the every semester would be conducted as per the schedule mentioned in the lesson plan. The subject handling faculty member follow rubrics, which is set by the department for evaluation of seminar.

University examination: These end-semester examinations are of 3- hour duration and cover the entire syllabus of the course. It would generally satisfy all course outcomes for a particular course. The COs are evaluated based on the set attainment levels.

Project Work Evaluation:

Mini-Project: There shall be field oriented Mini-Project, in collaboration with literary field of their specialization, to be taken up during the II Semester. However, the mini-project and its report shall be evaluated along with the project work in I year II Semester. The committee consists of an external examiner, head of the department, the supervisor of the mini-project and a senior faculty member of the department. There shall be no internal marks for literary field oriented mini-project.

Presentation: The content, quality of the presentation and communication skills are assessed by the evaluation committee.

Viva-voce: At the end of the presentation, the assessment panel and the student audience ask questions and seek clarifications on specific issues related to the seminar. The effectiveness of the student's response to these queries is assessed.

Major Project: Major Project is intended to be a challenge to the intellectual and innovative abilities of students. It gives students the opportunity to synthesize and apply the knowledge and analytical skills learned in the different disciplines. Out of a total of 200 marks for the project work, 50 marks shall be allotted for Internal Evaluation and 150 marks for the End Semester Examination (Viva Voce). The End Semester Examination of the project work shall be conducted by the same committee as appointed for the University external member. The Internal Evaluation shall be on the basis of two seminars given by each student on the topic of her project. Project will enable student to think innovatively on the development of advanced literature and technologies in the field of literature. Students are expected to Perform an in depth study of the topic assigned in light of the preliminary report prepared in the seventh semester. Review and finalise the approach to the problem. Develop a final product/ process, perform testing, arrive at results & conclusions and suggest future directions. Prepare a paper for Conference presentation/ publication, if possible. Prepare a report in the standard format for being evaluated by the Internal project Review Committee

Process for assessing the quality of Projects: The Internal project Review Committee and the project guide together will analyze the nature of the project and make sure that the work is environment friendly, ensures safety, ethics and cost effective. The projects are classified into different streams and their relevance to POs and PSOs are identified to ensure its quality.

(vii) Attainment of Program Outcomes and Program Specific Outcomes

The following are the Assessment Tools:

Several tools are described for assessing course outcomes. The program outcomes are based on the course outcomes. Thus, the tools remain the same for assessing the program outcomes. In addition, the tools of survey based on the alumni and exit surveys are considered.

- 1. The tools broadly are
- 2. End of course surveys (half yearly)
- 3. Student exit surveys
- 4. Alumni surveys yearly
- 5. Staff surveys yearly

6. Higher education and placement – student publications

(viii) Attainment Levels: Course outcomes of all courses are assessed with the help of above mentioned assessment tools and attainment level is evaluated based on set attainment rubrics as per table 8.2. If the average attainment of a particular course for two consecutive years is greater than 80% of the maximum attainment value (i.e. 80% of 3 = 2.4), then for that particular course the current rubrics for attainment must be changed to analyse continuous improvement.

Table 8.3: Assessment methods and levels:

| Assessment Methods | | Attainment Levels |
|-----------------------|---------|---------------------------------------|
| Internal Assessment | Level 1 | 60% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level 2 | 70% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level 3 | 70% of students scoring more than 40% |
| | | marks in internal assessment tools |
| University Assessment | Level 1 | 60% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level 2 | 70% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level 3 | 75% of students scoring more than 40% |
| | | marks in internal assessment tools |

(ix) Validation of CO-PO mapping

- Step 1: Obtain course outcome.
- Step 2: Mapping of course outcome with program outcome.
- Step 3: Setting weightage for CO assessment.
- Step 4: CO measurement through assessment.
- Step 5: Obtain CO attainment table through direct and indirect assessment methods.
- Step 6: Obtain PO attainment table through direct and indirect assessment methods.

With the CO-PO Mapping, we have attained and fulfilled the curriculum of the University with certain lacking which states that we will show our progress in the upcoming attainments.

(x) Assessment and Attainment methods:

Assessment is one or more processes which is carried out by the institution, thatidentify, collect and prepare data to evaluate the achievement of course outcomes and program outcomes. Attainment is the action or fact of achieving a standard result towards accomplishment of desired goals. Primarily attainment is the standard of academic attainment as observed by test and/or examination result. Assessment methods are categorized into two as direct method and indirect method to access CO's and PO's. The direct methods display the student's knowledge and skills from their performance in the continuous internal assessment tests, semester examinations and supporting activities such as seminars, assignments, case study, group discussion, online quiz, mini project etc., These methods provide a sampling of what students know and/or can do and provide strong evidence of student learning. The indirect method done through surveys and interviews, it asks the stakeholders to reflect their views on student's learning. The institute assesses opinions or thoughts about graduate's knowledge or skills by different stakeholders.

CO assessment methods are employed

Direct assessment method and indirect assessment method are considered for 90% and 10% weightages respectively.

Internal test assessment and end semester examination assessment are considered with the weightage of 25% and 75% respectively for the direct assessment of CO.

(xi) Procedure for Attainment of Program Outcomes

At the end of the each programme, the PO/PSO assessment is done from the CO attainment of all curriculum components. As per NAAC guidelines, program can appropriately define the attainment level. The attainment level may be set by the particular program or commonly by the institution. The attainment can be made as best the choice by the institution or the program by analyzing the students' knowledge. This can be achieved by using different supporting activities. This attainment is mainly for the purpose of makingan esteemed graduates with good analytical, practical and theoretical knowledge about the program by attaining the PEO's and PSO's of the program and the institution. For the evaluation and assessment of COs and POs, rubrics are used. The rubrics considered here are given below:

Attainment Level 1: 60% of students score more than 40% marks out of the maximum relevant marks.

Attainment Level 2: 70% of students score more than 40% marks out of the maximum relevant marks.

Attainment Level 3: 75% of students score more than 40% marks out of the maximum relevant marks.

(xii). Indirect Assessment Tools and Process:

Indirect assessment is done through program exit survey, alumni survey and employer survey where program exit survey and employer survey are given a weightage of 25% each and alumni survey is given a weightage of 50%.

1. Graduate Exit Survey:

A exit survey is conducted for students who have graduated out of the department for that year.

(i) Questionnaire Format

Kindly rate the following criteria on a scale of 1-5. Your genuine response will be helpful for the continuous quality improvement of our UG programme in ECE.

5.Excellent

4. Very Good

3. Good

2.Average

1.Poor

(ii) Evaluation Process

The questionnaire consists of 8 questions which is relevant for assessing each PO and PSO. Each question is having 5 options namely Excellent, Very Good, Good, Average and Poor, which is given marks 5,4,3,2,1 respectively. These survey results are tabulated and the average values corresponding to each PO and PSO are determined.

2. Alumni Survey:

Feedback is taken from alumni.

(i) Questionnaire Format

Kindly rate the following criteria on a scale of 1-5. Your genuine response will be helpful for the continuous quality improvement of our UG programme in ECE.

5.Excellent

4. Very Good

=

3. Good

2.Average

1.Poor

+

(ii) Evaluation Process

The questionnaire consists of 9 questions which is relevant for assessing each PO and PSO. Each question is having 5 options namely Excellent, Very Good, Good, Average and Poor, which is given marks 5,4,3,2,1 respectively. These marks are tabulated and the average values corresponding to each PO and PSO are determined.

Indirect Attainment

50% attainment of Graduate Exit survey +

50% attainment of Alumni survey

Overall Attainment of PO

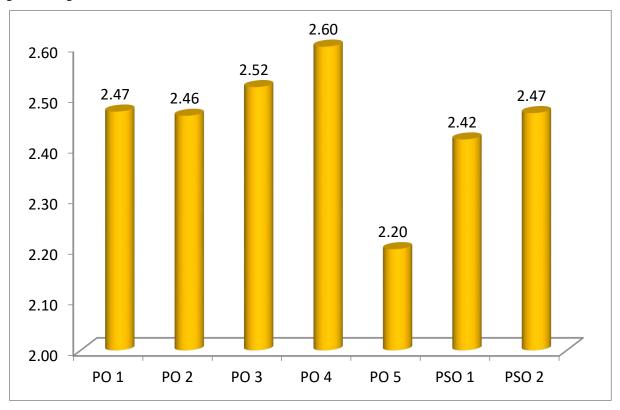

90% of Direct Attainment of each PO

10% Indirect Attainment of each PO

1. Institution Vision and Mission:

Vision:

• To emerge as a renowned women institution in academic excellence, equipping students with intellectual, spiritual and emotional strength to face the global challenges.

Mission:

- To set a standard in the realm of education by combining several fields of study.
- To educate and equip women with knowledge and skills needed for successful life.
- To provide value based education that integrates arts, science and spirituality.
- To provide faculty with domain specific knowledge and ICT skills.
- To concentrate on sensitive social issues through outreach and extension activities.

2. About the Department

The Department of English was started in the year 2016, offering BA English initially. Due to the growing demand for courses in English Language and Literature, MA English has been started in the year 2019. The Department focuses on English Studies has broadened our purview to include post colonial and Diaspora literatures from India, America and other countries of the world. We are the large department to teach General English to all departments of this college and enrich the students' language fluency through Readers Club and Literary Association.

Vision

- To balance the needs of general education communication, diversity, global perspectives, interdisciplinary studies.
- To acquire adequate funding to support the department's contributions to general education and the liberal arts through departmental budgets and hiring.

Mission

The Department's policies and its reading- and writing-intensive curriculum demonstrate our Commitment to the liberal arts.

3. Program Outcomes and Program Specific Outcomes

Program Outcomes (POs)

PO1: On completion of the program the student will be able to: Interpret his/her understanding of form, structure, narrative technique, devices and style.

PO2: Analyze and apply various literary concepts and critical approaches.

PO3: Appreciate the importance of English as an international language, to benefit from the achievements of the other cultures in accordance with various life situations

PO4: Organize and integrate the acquired knowledge towards individualistic compositions.

PO5: Present, appraise and defend arguments with conviction and confidence.

Program Specific Outcomes (PSOs)

PSO-1: The program introduces students to a wide range of emerging areas in the field of literary studies.

PSO-2: The program ensures extensive knowledge of different areas of literary studies.

4. Blooms Taxonomy

Bloom's Taxonomy was developed in 1956 by educational psychologist Dr. Benjamin Bloom to promote higher forms of thinking in education, such as analyzing and evaluating concepts, processes, procedures, and principles, rather than simply memorizing facts. It is most often used when designing educational, training, and learning processes.

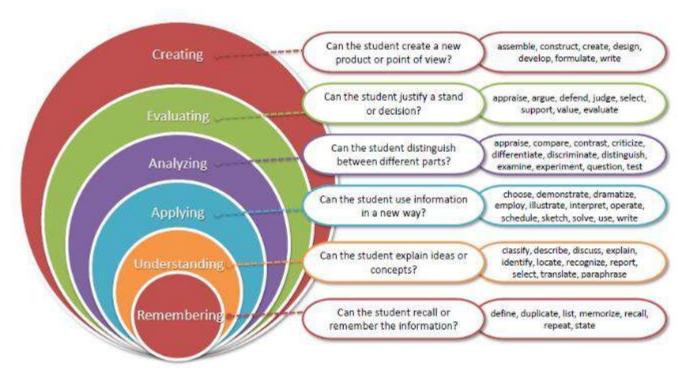

Figure 1. Pictorial representation of Blooms Taxonomy

| S. No. | Domain | Keywords | Examples |
|--------|-------------------------------|---------------------------------|-----------------------------|
| 1. | Remembering: | defines, describes, identifies, | Recite a policy. Quote |
| | Recall or retrieve previous | knows, labels, lists, matches, | Prices from memory to a |
| | learned information. | names, outlines, recalls, | customer. Recite the safety |

5. Course Outcomes (COs):

Statements indicating what a student can do after completing a course successfully. Each Course has some Course Outcomes. The course content covered in each module of a course is used to define the CO statements. There could be 5 or 6 COs for each course. Bloom's Taxonomy is used to define the keywords used to define COs.

SEMESTER - I

Course Name: British poetry (Chaucer to 20th century)

Course Code: DEN11

CO1: The student will learn about the metaphysical poets and their style of writings

CO2: The student will know about the love and lust towards opposite gender

CO3: The student will be able to differentiate the various types of sonnets.

CO4: The student will enjoy the beauty of nature and imagination.

CO5: The student will understand the romantic life of the poets.

Course Name: American literature

Course Code: DEN12

CO1: The student will come to know the prominent women writers

CO2: The student will able to distinguish the various thinking of American society.

CO3: The student will understand transcendentalists and naturalists.

CO4: The student will receive the seclusion temper and patriarchal society.

CO5: The student will learn the reality of working classes and middle classes living in cities

Course Name: Indian literature in English

Course Code: DEN13

CO1: The student will be able to know the importance of translation in various works.

CO2: The students will know the suffering and submissive conditions of people

CO3: The student will know the childhood sufferings and search for identify through short stories.

CO4: The student will learn the myths and ethics of Indians.

CO5: The student will know how to write the script.

Course Name: Advanced Linguistics

Course Code: DEN14

CO1: The student will follow the proper pronunciation of the words.

CO2: The student will learn how to communicate effectively in various places.

CO3: The student will easily know the difference between linguistics and non-linguistics.

CO4: The student will link the relationship between languages and literature.

CO5: The student will enjoy the dialects of various places and persons.

Course Name: Folk Tale and Myth

Course Code: DEEN15C

CO1: As per another legend, the disciplines of Gauthama were cursed to become lizards.

CO2: They resided in the temple and were relieved of the curse by divine grace of Vishnu. There is a panel in temple and was the two lizards are depicted in theroof of the temple.

CO3: The unit designates a critical approach in literary studies and also an eclectic approach to study the complex relationship between literature and myth.

CO4: In short complex, critical and theoretical questions about myth and literature continue to be asked.

CO5: Of the aesthetic values of modern critics connected with the general school of mythical view myth seems to be out- and –out rational.

Course Name: Basic Mathematics

Course Code: DOMA15A

CO1: The student will study exponential and logarithmic series.

CO2: The student will understand about matrices and its applications.

CO3: The student will formulate and solve the partial differential equations.

CO4: The student will apply the results on Laplace transform.

CO5: The students will learn the techniques on Fourier series.

Semester II

Course Name: British Drama

Course Code: DEN21

CO1: Apply discipline- specific skills to the creation of performance.

CO2: Draw connections between theatrical practices and social contexts in both modern and pre-modern periods.

CO3: They will demonstrate proficiency in specific skills like: acting, directing, choreography, play-writing or dramaturgy.

CO4: They will enable to analyze, interpret and evaluate the dramatic literature and theatrical productions.

CO5: The student will link the relationship between languages and literature.

Course Name: Translation Theory in World Literature

Course Code: DEN22

CO1: The learner knows about the history of translation and its practice.

CO2: Interpretation of SL and TL can be done.

CO3: Reproduction of the translation and the process and product can be understood.

CO4: Problem and solution of the translation and equivalence of teach translation can be learned.

CO5: Translation is done in practice.

Course Name: Contemporary Literature Theory

Course Code: DEN23

CO1: It reinforces the student's literary competence.

CO2: The students will develop an independent critical persona.

CO3: The student can understand the various types of theories.

CO4: Theories after the 20th century is learned.

CO5: Students wide innovative exposure with critical analysis

Course Name: New Literature in English

Course Code: DEEN24B

CO1: The learner can experience the poetry from various countries such as Canada, Australia and New Zealand.

CO2: Can understand the alienation among the works of the writers who belongs to different regions.

CO3: The criticism of the New Literature is also taught to the students.

CO4: Students starts to analyze the types of literature with new area.

CO5: Students compete their knowledge with types of literature.

Course Name: Fundamental of Insurance

Course Code: DOMA25A

CO1: The student will know about the different insurance sectors including life insurance.

CO2: To provide the idea of time of maturity, revival and surrender of policies and claims.

CO3: To study about the Marine and Fire insurance.

CO4: To study about Miscellaneous insurance.

CO5: To study about settlement of claims.

Course Name: Human Rights

Course Code: DHR20

CO1: The programme provides the student with the capacity to identify issues and problems relating to the realization of human rights, and strengthens the ability to contribute to the resolution of human rights issues and problems.

CO2: It also develops investigative and analytical skills.

CO3: In-depth insight into the constitutional, statutory and institutional aspects of human rights protection in India

CO4:understand the historical growth of the idea of human rights.

CO5: provides the student with the capacity to identify issues and problems relating to the realization of human rights

Semester III

Course Name: Non-Fiction and Prose

Course Code: DEN31

CO1: To learn the writing style from Russell's model.

CO2: To learn the value of lateral thinking.

CO3: To enjoy the value humour of Orwell.

CO4: To critically evaluate the post colonial issues presented in Orwell's essay.

CO5: To estimate T.S.Eliot as a scholarly critic.

Course Name: Research Methodology

Course Code: DEN 32

CO1: The learners are introduced to the definition, variables and research questions.

CO2: The learner can explore the Research Design, the difference between Quantitative and Qualitative Research.

CO3: The Concept of Measurement is introduced to the learners.

CO4: The learners are taught to interpret the data and layout.

CO5: The usage of the sources is taught to the learners.

Course Name: Contemporary Literary Theory II

Course Code: DEN33

CO1: It reinforces the student's literary competence.

CO2: The student will develop an independent critical persona.

CO3: The student can understand the various types of theories.

CO4: Theories after the 20th century are learned.

CO5: Learning perspectives and ideologies of Literary Theories.

Course Name: African and Canadian Writings

Course Code: DEN34

CO1: The pain of the exploited is taught via poetry.

CO2: The situation of woman in the colonies is taught.

CO3: The reaction of the colonizers against the capture is sketched.

CO4: Abuse of the colonial people for the trade of the capitalist is highlighted.

CO5: Explore the Black experience in Canada through the eyes of Black youth and young adults

Course Name: Children's Literature

Course Code: DEEN35B

CO1: The student will be inspired to pay more attention to nature.

CO2: The student will be motivated to visualize a world devoid of fears.

CO3: The student will understand the contrast between worlds of the childhood and reality.

CO4: The student will learn to appreciate how the poet deals with a simple idea in an extraordinary way.

CO5: The student will be inspired by thought and words of true genius.

Course Name: Mathematical Biology

Course Code: DOMA35A

CO1: To understand and know the discrete population growth models.

CO2: To study the continuous growth models.

CO3: To study the qualitative behavior of populations.

CO4: To know about the mathematical model epidemiology.

CO5: To know about the Arithmetic growth model and Geometric growth model.

Semester- IV

Course Name: World Literature in Translation

Course Code: DEN41

CO1: Helps the students to works in various fields of translation studies, comparative literature and world literature.

CO2: To know the importance of classical literature.

CO3: To give a world outlook to the learners.

CO4: Challenges the hegemony of English in world literature.

CO5: Make the students to learn the political values and emphasize on global processes over national traditions.

Course Name: Shakespeare Studies

Course Code: DEN42

CO1: Learn as to how Shakespearean comedy is interwoven with obstacles, misunderstanding, jealousy, disguise which ultimately leads to fictional nature of the characters in the play.

CO2: Learn how Shakespeare has used revenge tragedy in extensively to make the audience learn and correct themselves through Aristotle's principle of catharsis.

CO3: Learn the genre of Historical plays of Shakespeare. Shakespeare's inspiration from chronicles of Holinshed to draw plots for his Historical plays is vividly presented in such a way that it will make even commoners learn about the king's history.

CO4: Learn the struggles between reason and emotion, the clash of east and west and the very definition of honour, while all the way they are exposed to political intrigue, power struggle and struggle between the lovers.

CO5: increase their familiarity with Shakespearean language and expression

Course Name: Single Author Study

Course Code: DEN43

CO1: The learners are exposed to the poetry of Tagore.

CO2: The essays of Tagore are introduced to the learners.

CO3: The students can experience the rich themes and characterization in the plays of Tagore.

CO4: The writing style of Tagore can be explored in Short Stories.

CO5: The learners can also understand the style of Tagore in his no.

Course Name: Gender Studies
Course Code: DEEN44B

CO1: To learn as to how the second wave of feminism kick – started its course with the publication of The Second Sex. Women's struggle throughout history is brought out.

- CO2: The different between feminism and womanism. Womanize as a separate entity to bring out the double suppression of black women in the hands of white and black men.
- CO3: Learn the plight of women who are physically harassed to keep them under the control of men. However they are revisited in recorded history to stand against men, despite their physical indifference,
- CO4: Learn the importance and the role of myth in the control of the women throughout history while also learning a need to rewrite the changes in the myth via Panchali form the Mahabharata.
- CO5: Learn the struggles of transgender so as to face problems from within and also from the society to find their own identity, an identity crisis marred constantly due to the bias in society towards the classification of sex.

Course Name: Entrepreneurial Development

Course Code: DOMA45A

CO1: To provide an understanding of basic concept in the area of entrepreneurship.

CO2: To expose students to the idea generation, creating awareness of business Opportunities.

CO3: To familiarizing them with formal practices in effective project formation.

CO4: To provide insights to students on entrepreneurial finance.

CO5: To know about the role of various Government agencies in assisting Entrepreneurship.

6. CO – PO and CO – PSO Mapping of Courses:

All the courses together must cover all the POs (and PSOs). For a course we map the COs to POs through the CO-PO matrix and to PSOs through the CO-PSO matrix as shown below. The various correlation levels are:

"1" – Slight (Low) Correlation

"2" – Moderate (Medium) Correlation

"3" - Substantial (High) Correlation

"-" indicates there is no correlation.

Mapping of Course Outcomes & Programme Outcomes to Programme Specific Outcomes

| | PO1 | PO2 | PO3 | PO4 | PO5 | PSO1 | PSO2 |
|-----|-----|-----|-----|-----|-----|------|------|
| CO1 | | | | | | | |
| CO2 | | | | | | | |
| CO3 | | | | | | | |
| CO4 | | | | | | | |
| CO5 | | | | | | | |
| CO6 | | | | | | | |

Correlation Level: H – High, M- Moderate, L-Low

6.1 Levels of Outcomes

There are four levels of outcome such as Course Outcome (CO), Program Outcome (PO), Program Specific Outcome (PSO) and Program Educational Objective (PEO). Course Outcomes are the statements that declare what students should be able to do at the end of a course. POs are defined by Accreditation Agencies of the country (NBA in India), which are the statements about the knowledge, skills and attitudes, graduate attributes of a forma engineering program should have. Graduates Attributes (GAs) are the components indicative of the graduate's potential to acquire competence to practice at the appropriate level. Gas form a set of individually assessable outcomes of the program. The NBA laid down the graduate attributes relating to program outcomes and is to be derived by program.

The Program outcomes reflect the ability of graduates to demonstrate knowledge in fundamentals of Basic Sciences, Humanities and Social Sciences, Engineering Sciences and apply

these principles in understanding and practically apply the knowledge in professional core subjects, electives and projects which enables the graduates to be competent at the time of graduation. The graduates must adhere to professional and ethical responsibilities in the pursuit of their careers and also for the benefit of the society. These outcomes also enable the graduate to pursue higher studies and engage in R&D for a successful professional career.

The proper definition and the attainment of POs contribute to the attainment of Program Educational Objectives which will help the graduate to perform his/ her duties, professional responsibilities, design, development, production and testing of novel producible to deal with finances and project management during his/her early professional career of 3 to 4 years.

Program Specific Outcomes are the statements that assert what the grandaunts of a specific engineering program should do what they can able to do. Program Educational Objectives are the broad statements which describe in detail about the career and professional accomplishments after significant years of graduation that the program prepare the grandaunts to achieve.

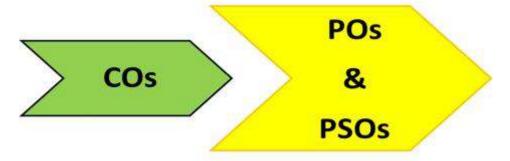

Figure 2. Relating the outcomes (Cos – POs &PSOs)

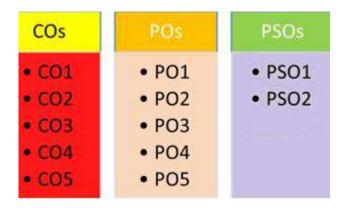

Figure 3. Relationship between COs, and POs & PSOs

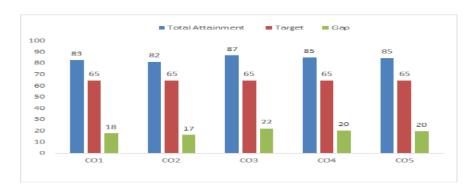

The above Figure 2 and Figure 3 show the building block of CO-PO&PSO relationship. After CO statements are developed by the course in-charge, CO will map with any possible PO's based on the relationship exist between them. But the PO's are not necessarily mapped with any one CO and it may be left blank. Anyhow, it is mandatory that all POs should be mapped with any one of PSOs which are specified in the program.

6.2 Process involved in CO-PO Mapping

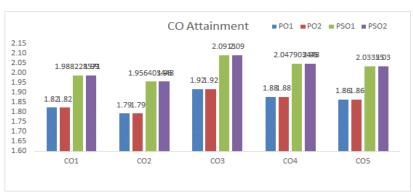

The role of CO-PO mapping will be assigned to the faculty as per hierarchy followed in Figure 3. After the course (subject) allotment from the department, the course in-charge of the course has to write appropriate COs for their corresponding course. It should be narrower and measurable statements. By using the action verbs of learning levels, CO's will be designed. CO statements should describe what the students are expected to know and able to do at the end of each course, which are related to the skills, knowledge and behavior that students will acquire through the course. After writing the CO statements, CO will be mapped with PO of the department. If the department is having more than one section in a year or the same course is available for more than one program of the same institute in a semester, the subject expert will be nominated as course coordinator of the corresponding course. The role of the course coordinator is to review the CO statements and the CO-PO mapping which has been done by course in-charge. The year wise coordinator has to consolidate the CO's of the respective year and maintain the documentation of the CO attainment level of the respective year courses as well as documentation of the individual students' extra-curricular and co-curricular activities. These details will hand over to the program coordinator in order to evaluate PO attainment of the individual student as well as individual course at the end of the fourth semester. The Program coordinator has to evaluate the PO attainment of individual student through direct and indirect method after the student completing their program.

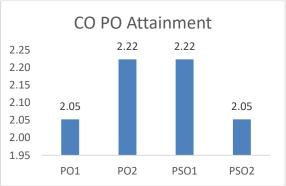

7. CO-PO Mapping

8. CO-PO ASSESSMENT

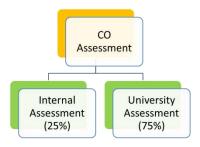

8.1 Assessment Process for CO Attainment: For the evaluation and assessment of CO's and PO's, rubrics are used. The rubrics considered here are given below:

(i) CO Assessment Rubrics:

O Assessment Internal Assessment (25% weightage) University Assessment (75% weightage)Course and in university examination of a course. Internal assessment contributes 25% and university assessment contributes 75% to the total attainment of a CO.

(ii) CO-Assessment Process:

Assessment Parameters: The performance of a student in each semester shall be evaluated course Outcome is evaluated based on the performance of students in internal assessments and in university examination of a course. Internal assessment contributes 25% and university assessment contributes 75% to the total attainment of a CO.

Course Outcome is evaluated based on the performance of students in internal assessments

- wise with a maximum of 100 marks for theory course and 100 marks for laboratory.

(iii) CO Assessment Tools:

The description of Assessment tools used for the evaluation of program outcomes is given in the Table 8.1. The various assessment tools used to evaluate COs and the frequency with which the assessment processes are carried out are also listed.

In each course, the level of attainment of each CO is compared with the predefined targets, if is not the course coordinator takes necessary steps for the improvement to reach the target. With the help of CO against PO/PSO mapping, the PO/PSO attainment is calculated by the program coordinator.

Table 8.1: Evaluation of COs & POs:

| Mode of Assessme | Assessment Tool | Description | Evaluation of Course Outcomes | Related POs/PSOs | Frequency of |
|---------------------|------------------------------------|--------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|---------------------------------------------------------|
| nt | | | 2 2222 | | Assessment |
| Direct | Theory Internal Examinations | Three Written examinations are conducted and its average are evaluated | The questions in the internal examinations and assignment sheets are mapped against COs of respective course. The questions for two internal examinations and assignments are framed in such a way to cover all course outcomes. | PO1 to PO5, PSO1 &PSO2 | Three per semester |
| Direct | Assignments | Three assignments are given for each course for continuous assessment average marks are considered | The final attainment for each CO under direct assessment is calculated by taking from average of the CO attainments Internal Examinations and Assignments | PO1 to PO5, PSO1 & PSO2 | Continuous |
| Direct | Assignment | The day to day evaluation is considered | The final attainment of each CO is calculated by taking average of the % attainment from day to day evaluation and Internal examination | PO1 to PO5, PSO1 & PSO2 | Continuous |
| Direct | Field oriented Project | To test students concepts in design, creative thinking and independent analysis. Two project reviews are conducted | Two internal project reviews are conducted and average of these two review assessments are conducted | PO1 to PO5, PSO1 & PSO2 | One project review is conducted in IV semester |
| Direct | Comprehensi | To assess the | The assessment is | PO1 to PO5, | IV semester |

| Examination | technical and | three senior Faculty | PSO2 |
| | analytical | members along with | |
| | skills with | students overall | |
| | communicatio | academic performance. | |
| | n skills | | |

(iv) Pattern of Theory course Evaluation

(a) Pattern for Internal Examinations: For theory courses of each semester there shall be three (CIA – I & II and Model) descriptive exams. CIA – I & II will be held for 90 minutes and model examination for 3 hours. These exams will be taken for the assessment of internal marks. The first internal examination will be conducted as per the plan in the academic calendar and the schedule planned by examination cell.

(b) Pattern for External End Examinations:

There shall be an external examination for every theory course and consists of three parts (Part-A,Part-B& Part - C). The duration of the time for this end examination is 3 hours.

Assessment Rubrics: An overall cut-off value is taken for all CO's commonly based on the highest mark secured and the number of students with their external mark above the cut-off value is considered for rating all CO attainments.

(v) CO-wise assessment Rubrics: Every internal questions and every assignment is mapped to a specific COs. Thereafter, a CO -wise cut-off value is taken based on the highestmark secured for that CO and the number of students with their internal mark above the cutoff Value is considered for rating the CO attainment.

(vi) Quality/Relevance of Assessment Process:

Theory: Internal exams motivate students to keep up with subject content covered in class. Three written examinations are conducted and its average marks are considered. For theory subjects, during a semester there shall be 2 CIA examinations and one Model Examination. Each CIA examination consists of descriptive paper and one assignment. The descriptive papers CIA I and CIA II shall be for 50marks each with a total duration of 1 ½ hours and Model Examination is for 75 marks with the total duration of 3 hours. The descriptive paper pattern is given in the below table. While the CIA-I examination shall be conducted on 1 to 2 units of the syllabus, CIA II shall be conducted for 3 and 4

unit. And model Exam is conducted for 75 marks with whole syllabus. Ten marks (10) marks are allocated for Assignments (as specified by the subject teacher concerned).

Table 8.2: Internal test question paper set-up:

| Internal Exam | CIA I (50 marks) | CIA II (50 marks) | Model (75 marks) |
|---------------------|------------------|-------------------|------------------|
| Part – A (2 marks) | 2X5=10marks | 2X5=10marks | 2X10=20marks |
| Part – B (5 marks) | 4X5=20 marks | 4X5=20 marks | 5X5=25 marks |
| Part – C (10 marks) | 2X10=20 marks | 2X10=20 marks | 3X10=30 marks |

Assignment: The first Assignment should be submitted before the conduct of the CIA-II examination and the third Assignment should be submitted before the conduct of the CIA-II examination and the third Assignment should be submitted before the conduct of the model examination. The total marks secured by the student in each I and II CIA are evaluated for 50 marks and model exam for 75 marks, and the average of the three CIA examinations shall be taken as the final marks secured by each candidate. The questions in the internal examinations and assignment sheets are mapped against COs of respective course. The questions for two internal examinations and Assignments are framed in such a way to cover all Course Outcomes. The questions are framed in such a way that it should satisfy Bloom's Taxonomy, wherein each question is mapped to the appropriate course outcome of the respective course, which is evaluated based on the set attainment levels by the department.

Seminar Work Evaluation:

The subject handling faculty member would assess the Technical seminar presentations by the students. She would ensure that the students choose advanced concepts in the respective areas with a lot of relevance and applicability. One seminar per student in the every semester would be conducted as per the schedule mentioned in the lesson plan. The subject handling faculty member follow rubrics, which is set by the department for evaluation of seminar.

University examination: These end-semester examinations are of 3- hour duration and cover the entire syllabus of the course. It would generally satisfy all course outcomes for a particular course. The COs are evaluated based on the set attainment levels.

Project Work Evaluation:

Mini-Project: There shall be field oriented Mini-Project, in collaboration with literary field of their specialization, to be taken up during the II Semester. However, the mini-project and its report shall be evaluated along with the project work in I year II Semester. The committee consists of an external examiner, head of the department, the supervisor of the mini-project and a senior faculty member of the department. There shall be no internal marks for literary field oriented mini-project.

Presentation: The content, quality of the presentation and communication skills are assessed by the evaluation committee.

Viva-voce: At the end of the presentation, the assessment panel and the student audience ask questions and seek clarifications on specific issues related to the seminar. The effectiveness of the student's response to these queries is assessed.

Major Project: Major Project is intended to be a challenge to the intellectual and innovative abilities of students. It gives students the opportunity to synthesize and apply the knowledge and analytical skills learned in the different disciplines. Out of a total of 200 marks for the project work, 50 marks shall be allotted for Internal Evaluation and 150 marks for the End Semester Examination (Viva Voce). The End Semester Examination of the project work shall be conducted by the same committee as appointed for the University external member. The Internal Evaluation shall be on the basis of two seminars given by each student on the topic of her project. Project will enable student to think innovatively on the development of advanced literature and technologies in the field of literature. Students are expected to Perform an in depth study of the topic assigned in light of the preliminary report prepared in the seventh semester. Review and finalise the approach to the problem. Develop a final product/ process, perform testing, arrive at results & conclusions and suggest future directions. Prepare a paper for Conference presentation/ publication, if possible. Prepare a report in the standard format for being evaluated by the Internal project Review Committee

Process for assessing the quality of Projects: The Internal project Review Committee and the project guide together will analyze the nature of the project and make sure that the work is environment friendly, ensures safety, ethics and cost effective. The projects are classified into different streams and their relevance to POs and PSOs are identified to ensure its quality.

(vii) Attainment of Program Outcomes and Program Specific Outcomes The following are the Assessment Tools: Several tools are described for assessing course outcomes. The program outcomes are based on the course outcomes. Thus, the tools remain the same for assessing the program outcomes. In addition, the tools of survey based on the alumni and exit surveys are considered.

- 1. The tools broadly are
- 2. End of course surveys (half yearly)
- 3. Student exit surveys
- 4. Alumni surveys yearly
- 5. Staff surveys yearly
- 6. Higher education and placement student publications

(viii) Attainment Levels: Course outcomes of all courses are assessed with the help of above mentioned assessment tools and attainment level is evaluated based on set attainment rubrics as per table 8.2. If the average attainment of a particular course for two consecutive years is greater than 80% of the maximum attainment value (i.e. 80% of 3 = 2.4), then for that particular course the current rubrics for attainment must be changed to analyse continuous improvement.

Table 8.3: Assessment methods and levels:

| Assessment Methods | | Attainment Levels |
|-----------------------|---------|---------------------------------------|
| Internal Assessment | Level 1 | 60% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level 2 | 70% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level 3 | 70% of students scoring more than 40% |
| | | marks in internal assessment tools |
| University Assessment | Level 1 | 60% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level 2 | 70% of students scoring more than 40% |
| | | marks in internal assessment tools |
| | Level 3 | 75% of students scoring more than 40% |
| | | marks in internal assessment tools |

(ix) Validation of CO-PO mapping

- Step 1: Obtain course outcome.
- Step 2: Mapping of course outcome with program outcome.
- Step 3: Setting weightage for CO assessment.
- Step 4: CO measurement through assessment.
- Step 5: Obtain CO attainment table through direct and indirect assessment methods.
- Step 6: Obtain PO attainment table through direct and indirect assessment methods.

With the CO-PO Mapping, we have attained and fulfilled the curriculum of the University with certain lacking which states that we will show our progress in the upcoming attainments.

(x) Assessment and Attainment methods:

Assessment is one or more processes which is carried out by the institution, thatidentify, collect and prepare data to evaluate the achievement of course outcomes and program outcomes. Attainment is the action or fact of achieving a standard result towards accomplishment of desired goals. Primarily attainment is the standard of academic attainment as observed by test and/or examination result. Assessment methods are categorized into two as direct method and indirect method to access CO's and PO's. The direct methods display the student's knowledge and skills from their performance in the continuous internal assessment tests, semester examinations and supporting activities such as seminars, assignments, case study, group discussion, online quiz, mini project etc., These methods provide a sampling of what students know and/or can do and provide strong evidence of student learning. The indirect method done through surveys and interviews, it asks the stakeholders to reflect their views on student's learning. The institute assesses opinions or thoughts about graduate's knowledge or skills by different stakeholders.

CO assessment methods are employed

Direct assessment method and indirect assessment method are considered for 90% and 10% weightages respectively.

Internal test assessment and end semester examination assessment are considered with the weightage of 25% and 75% respectively for the direct assessment of CO.

(xi) Procedure for Attainment of Program Outcomes

At the end of the each programme, the PO/PSO assessment is done from the CO attainment of all curriculum components. As per NAAC guidelines, program can appropriately define the attainment level. The attainment level may be set by the particular program or commonly by the institution. The attainment can be made as best the choice by the institution or the program by analyzing the students' knowledge. This can be achieved by using different supporting activities. This attainment is mainly for the purpose of makingan esteemed graduates with good analytical, practical and theoretical knowledge about the program by attaining the PEO's and PSO's of the program and the institution. For the evaluation and assessment of COs and POs, rubrics are used. The rubrics considered here are given below:

Attainment Level 1: 60% of students score more than 40% marks out of the maximum relevant marks. Attainment Level 2: 70% of students score more than 40% marks out of the maximum relevant marks. Attainment Level 3: 75% of students score more than 40% marks out of the maximum relevant marks.

(xii). Indirect Assessment Tools and Process:

Indirect assessment is done through program exit survey, alumni survey and employer survey where program exit survey and employer survey are given a weightage of 25% each and alumni survey is given a weightage of 50%.

1. Graduate Exit Survey:

A exit survey is conducted for students who have graduated out of the department for that year.

(i) Questionnaire Format

Kindly rate the following criteria on a scale of 1-5. Your genuine response will be helpful for the continuous quality improvement of our UG programme in ECE.

5.Excellent

4. Very Good

3. Good

2.Average

1.Poor

(ii) Evaluation Process

The questionnaire consists of 8 questions which is relevant for assessing each PO and PSO. Each question is having 5 options namely Excellent, Very Good, Good, Average and Poor, which is given marks 5,4,3,2,1 respectively. These survey results are tabulated and the average values corresponding to each PO and PSO are determined.

2. Alumni Survey:

Feedback is taken from alumni.

(i) Questionnaire Format

Kindly rate the following criteria on a scale of 1-5. Your genuine response will be helpful for the continuous quality improvement of our UG programme in ECE.

5.Excellent 4. Very Good 3. Good 2.Average 1.Poor

(ii) Evaluation Process

The questionnaire consists of 9 questions which is relevant for assessing each PO and PSO. Each question is having 5 options namely Excellent, Very Good, Good, Average and Poor, which is given marks 5,4,3,2,1 respectively. These marks are tabulated and the average values corresponding to each PO and PSO are determined.

Indirect Attainment = 50% attainment of Graduate Exit survey +

50% attainment of Alumni survey

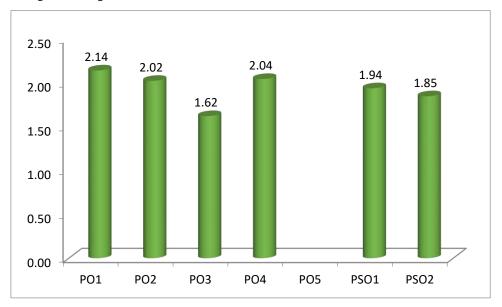

Overall Attainment of PO = 90% of Direct Attainment of each PO +

10% Indirect Attainment of each PO

Table 8.4: Overall CO- PO Attainment

| Sem ester | Subject Code | Subject Name | PO1 | PO2 | PO3 | PO4 | PO5 | PSO1 | PSO2 |
|--------------|----------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|------------------------------------------------|--------------------------|-----------------------|-----------------------|---------------------------------------------------|----------------------------------------------------------|
